APPENDIX 1: MEETING DOCUMENTATION

ITEM 8

8.1 Olympic Winter Games 2022 in Beijing

The 2022 BOCOG team reported that it is on the final stretch to prepare for the Games. The lessons learned from the Tokyo Games are being reflected and the Covid-19 prevention and control policy is going to be published toward end of October in the first edition of the Beijing 2022 Playbooks (can be found under Appendix 2) which are jointly developed by Beijing 2022 and IOC. The following principles were announced in order to help deliver safe and successful Olympic and Paralympic Winter Games:

1. Vaccination policy

- All athletes and Games participants who are fully vaccinated as described in the Playbook, will enter the closed-loop management system upon arrival. Games participants who are not fully vaccinated will have to serve a 21-day quarantine upon arrival in Beijing.
- Athletes who can provide a justified medical exemption will have their cases considered.
- All vaccines recognised by WHO or related international organisations, or approved officially by the countries or regions concerned, will be accepted.

2. Games-time closed-loop management

- From 23 January until the end of the Paralympics, a closed-loop management system will be implemented to ensure the safe delivery of the Games. This closed-loop management system will cover all Games-related areas, including arrival and departure, transport, accommodation, catering, competitions, and the Opening and Closing Ceremonies. Within the closed loop, participants will be allowed to move only between Games-related venues for training, competitions and work. A dedicated Games transport system will be put in place.

3. Spectators/Ticketing

- Tickets will be sold exclusively to spectators residing in China's mainland, who meet the requirements of the COVID-19 countermeasures.
- Specific requirements on COVID-19 countermeasures for spectators from China's mainland and the details of ticketing arrangements are under discussion and development, and will be released to the public in due course once they are finalised.

4. Accredited guest policy

- Beijing 2022 and the IOC underlined that all activities are being assessed and optimised to focus on essential aspects of Games delivery. Stakeholders will apply this principle for their plans and delegation composition.

- In line with this principle, the IOC EB decided to cancel the accompanying guest category for all stakeholders.

5. Travel

- Beijing 2022 will assist those stakeholders that are not in a position to book their pre-Games or Games-time flights independently.

6. Accommodation

- Besides athletes and some delegation officials who are accompanying athletes living in the Villages, all participants travelling to Beijing will reside in Beijing 2022-contracted hotels that will be compliant with the COVID-19 countermeasures for the Games.

7. Testing

- All domestic and international Games participants and workforce in the closed-loop management system will be subject to daily testing.

As in the Tokio Games a key function of each NOC and IF will be the CLO (Covid Liaison Officer) who is in charge for overseeing all C19 related prevention measures of the delegation.

FIS has recently executed a FIS Final Inspection online meeting as well as site inspection for the last preparations and homologations of the Cross-Country and Ski Jumping venue.

FIS Ethics Office & Integrity Hotline Information Session for NSAs

The Ethics Office together with FIS Administration provided during the FIS Autumn Technical Committee Meetings 2021 an information session on the basics of Ethics Office and Integrity Hotline. The recording is available for the FIS family on the FIS website ([Integrity Hotline](#) section).

Prevention against Competition Manipulation

The IOC Integrity Department developed an online education tool for participants for the Olympic Winter Games in Beijing 2022, as well as various communication tools for FIS to customise for its needs. In cooperation with the Integrity Department FIS works on a small strategy for pre-Games time to raise awareness in this area.

11.1 Anti-Doping Update Activities

Vice-President Roman Kumpost will report on the status of anti-doping activities since the previous Meeting of the Council.

11.1.1 Anti-Doping Testing Activities

The Testing programme is well on track and the additional C19 prevention measures continue to be in place for all doping controls authorised by the FIS.

11.1.2 Dried Blood Spot Analysis

The World Anti-Doping Agency (WADA) has approved a new Technical Document on the so-called “Dried Blood Spot” Analysis and it came into force in September 2021. The sample is being collected by either a finger prick or by a device through the upper arm. Advantages are the easier way of sample collection, less invasive method, it requires only a small amount of blood, less expensive collection and transport, as well as possible benefits in terms of sample stability.

FIS has made arrangements with sample collection providers as well as available WADA-accredited laboratories to include this analysis in its regular test distribution plan.

11.2 International / National Doping cases

11.2.1 International Doping cases

No international cases (FIS results management) have been recorded since the previous Meeting of the Council on 1st and 2nd June 2021.

11.2.2 National Doping cases

The following national doping cases have been recorded since the previous Meeting of the Council on 1st and 2nd June 2021:

In accordance with the World Anti-Doping Code, FIS is not entitled to review and/or amend decisions of doping cases from tests that have been carried out by the National Anti-Doping Agencies, but both FIS and WADA may appeal any decisions to the Court of Arbitration for Sport (CAS) in the event that either organisation believe that an inappropriate decision has been taken in accordance with the relevant rules and deadlines:

International Testing Agency

Looking ahead to the Olympic Winter Games Beijing 2022, the International Testing Agency has been tasked by the IOC to act as the secretary of the so-called Pre-Games Expert Group in terms of doping control testing recommendations. The aim is to ensure that athletes who have qualified or may qualify for the Olympic Winter Games Beijing 2022 are subject to an effective testing programme between now and the beginning of the Games.

The FIS has received on 30th September 2021 the testing recommendations for the Pre-Games period (July 2021 – January 2022) consisting of 788 athletes (whereby 260 of those are currently athletes included in FIS Testing Pools, resulting in 867 testing recommendations for those group) and 2'789 overall testing recommendations. FIS' task is now to coordinate test completions with the National Anti-Doping Agencies as best as possible within the given timeframe.

Art. 3.2.3.1 will be tested during the upcoming winter season.

World Cup Rules Women

4.2 Qualification round

The qualification round reduces the number of participants to 40.

Qualification round for KO-system competition see art. 4.6

All jumpers, must participate in the qualification round. The total score counts for the result.

A jumper, who has reached 95 % of the maximum length of the longest jump by the jumpers who have to qualify but has a fall, has the right to participate in the competition in addition to the 40 (If the wind/gate compensation is used, the compensated distance is the basis).

In case the number of participating athletes is 40 or lower, a Prologue competition round can be organized.

4.6 KO-System

The Jumping Committee is entitled to modify the above mentioned rules for the qualification and competition rounds.

Based on a decision of the FIS Jumping Committee and with the approval of the FIS Council with the new modus, the number of participants in the first competition round will be reduced to the half (25 participants) for the final round by a comparison of performance in pairs (KO system) and filled up to a total of 30 participants with the five athletes (best loser) who have reached the best total score points.

4.6.1 The qualification round will be carried out with an exception that the score (the total score points achieved) is not only decisive for the participation in the first competitive round but also for the starting order. The qualification round of competition confirmed in the calendar with KO system reduces the number of participants in the first competition round to 50. In case that number of participants in such a competition is lower than 50, KO system will be not used and all entered participants will start in the first competition round.

4.6.2 The first competition round is contested by 25 pairs of jumpers so that exactly 50 athletes have to be selected in the qualification round. It is therefore not possible to increase this number in case of several competitors in equal last places or maximum distance with a too low total score because of a fall. In order to respect fairness and to ensure a clear decision, the following rules are to be observed:

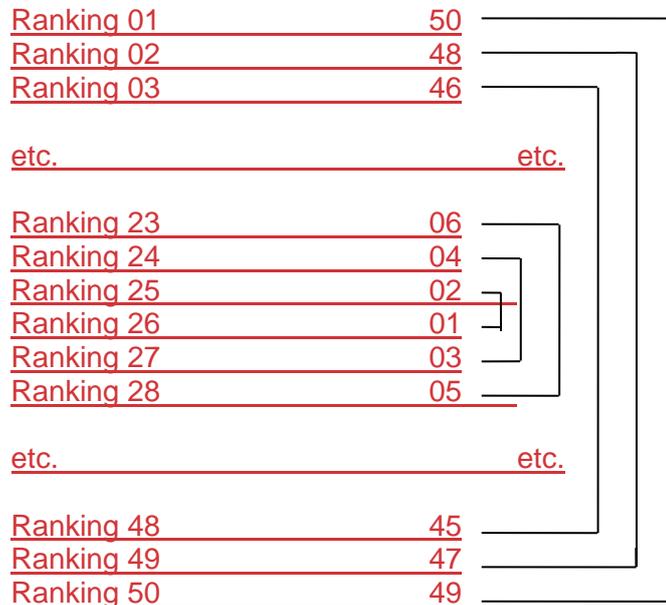

4.6.2.1 If two or more jumpers obtain the same total score in the Qualification round, the athlete with the higher start number will be ranked in the better position (see ICR art. 433.4).

4.6.3 Based on these rules, the following system is in place for the ranking of the qualification round:
Based on the total scores achieved, firstly a normal ranking from positions 1 to 50 is to be established.

4.6.4 For the first competition round the pairs of jumpers are to be established as follows:

Ranking in the qualification round = Start order in the first scoring round

will be the start number

4.6.5 The pairs will start in the following order:

<u>Start no. 26</u>	<u>against start no. 25</u>	<u>as 1st pair</u>
<u>Start no. 27</u>	<u>against start no. 24</u>	<u>as 2nd pair</u>
<u>etc.</u>	<u>etc.</u>	<u>etc.</u>
<u>Start no. 49</u>	<u>against start no. 02</u>	<u>as 24th pair</u>
<u>Start no. 50</u>	<u>against start no. 01</u>	<u>as 25th pair</u>

4.6.6 As a result of the comparison in pairs the jumper with the better total scoring reaches the final round. If the two jumpers competing against each other achieve the same total score, the jumper with the lower start number will advance.

4.6.7 Those 25 athletes will participate in the final round who have qualified for the final in the KO elimination. In addition there are the five losing jumpers which have the best total scores. In exceptional cases of a lower number of winners, the number of losing jumpers will be increased. The number of participants for the second round can also be increased through tied jumpers on the last qualified place or/and jumpers who have reached 95 % of the longest jump (art. 4.2.1.3) but had a fall (If the wind/gate compensation is used, the compensated distance is the basis).

4.6.8 The starting order in the final round results from the reverse ranking order of the total scores in the first scoring round.

In case of equal total scores the jumper with the higher starting number will jump first.

The overall score of the competition is determined by the total scores from both competitive rounds, i.e. the sum of both total scores.

Ski Jumping Committee recommendations [FOR DECISION]

Olympic Winter Games 2026 Programme

Based on many letters of support from several National Ski Associations (Austria, Germany, Japan, Norway, Poland, Slovenia, Sweden) the Jumping Committee unanimously support the introduction of the Individual Women competition on the large hill for the Olympic Winter Games programme, starting from the Olympic Winter Games 2026.

The Council has to decide if they support this proposal and submit it to the Congress 2022.

FIS Nordic World Ski Championships 2027 Candidates

The Jumping Committee further acknowledges that Falun (SWE) is the only candidate for the FIS Nordic World Ski Championships 2027. Based on the previous commitment for the WSC 2015 from the Swedish Ski Association and the LOC and the missing legacy for the Ski Jumping discipline in Falun, the Committee unanimously supports the request of the construction of a small hill in Falun as part of the bidding process and also the organization of the WSC 2027 (if the World Ski Championships will be assigned). The Jumping Committee strongly supports the legacy of this event as development opportunity for the discipline in a traditional Nordic country.
