

FIS NORDIC ACCREDITATION SYSTEM 2026/2027

Updated May 2026

The concept of the FIS Nordic Accreditation system is based on the application of a set of standard access zones (1-5) designed to enable consistency and optimise working efficiency across the FIS Nordic World Cup events

The Accreditation Matrix illustrates the method for authorisation and distribution of the FIS Season Accreditations for the Categories/Functions currently in use. The general definitions for each Standard Access Zone and Category provide guidance for the recommended access for each function.
