## 2. Summary of TD Education

### 2.1 Application Process

TD Applicants should be active members of the FIS or NSA. Ideally, they have a background in the sport and communicate effectively in English. They should be physically fit and be enthusiastic about sport. Being dependable, sociable, and calm under pressure are fundamental character requirements.

Before being accepted as an applicant, the person is officially nominated by his/her NSA. The nomination documents need to be completed and will be checked by the TD Advisory group for SBFSEK upon acceptance to the FIS TD education. Documents need to be submitted to [hostettler@fis-ski.com](mailto:hostettler@fis-ski.com).

Upon acceptance to become a FIS Aerials/Moguls TD, the applicant will receive access to the FIS E-Learning platform Moodle.

### 2.2 Applicant Phase

The Applicant must:

- Study the online course "Welcome to FIS"
- Study the online course "How do we work at FIS"
- Study the course "Foundational Training Aerials/Moguls"
- Prove necessary English skills
- Pass the online Multiple-Choice exam

### 2.3 Candidate Phase

*First year:*

The Candidate must:

- attend the annual FIS TD clinic (online or in person)
- complete a practical training as TD candidate or participate at an official Assist Program that is officially evaluated
- function as TD in at least one event on various levels (except World Cup) under the supervision of a FIS TD that is officially evaluated

*Second year:*

The Candidate must:

- attend a second annual FIS TD clinic (online or in person)
- if not done within the first year, complete a practical training as TD candidate or participate at an official Assist Program that is officially evaluated
- if not done in the first year, function as TD in at least one event on various levels (except World Cup) under the supervision of a FIS TD that is officially evaluated
- Pass a written exam
- Pass an oral exam

A candidate must take the final exam within 4 seasons of becoming a Candidate. A candidate who fails the examination can request to be re-examined at the next seminar, but after 6 seasons the latest.

The exam can be taken maximum two times. There can be no more than 4 seasons between exams.

## 2.4 *Licensed Phase*

In general, the TD license is valid for 4 years.

The Licensed TD must:

- Participate in a TD Clinic every second year in person (with justified exemptions up to four year is possible)
- Participate in an online TD update every year including two online tests/year (May and within two weeks before the first assignment)
- Prove active engagement in TD work demonstrated by assignments. In detail, TDs must prove at least two FIS TD assignment/year with at least one on Continental Cup level or below
- Prove active engagement in development of Aerials and Moguls in their country (i.e., organizing kids races, support the TD education, support LOCs in quality management)
- A TD license will be revoked if the TD fails to work as an assigned FIS TD for two consecutive years without justified cause.
- A TD license will be revoked if the TD fails to attend a TD clinic every four years the latest without a justified cause.

## **3. Training and Education Opportunities**

### *3.1 Clinics and Updates*

TD Candidates and licensed TDs need to actively engage in TD Clinics and Updates. Not only will the candidates participate alongside licensed TDs, but they will also contribute to the learning process. These sessions go beyond traditional lectures, incorporating interactive workshops, role-plays, simulations, and real-case presentations.

Clinics and Updates are key in TD education and as such reserved for TD Candidates and licensed FIS TD. However, if the space and logistics allow, other interested stakeholders, such as National TDs (licensed and/or in training, LOC members, coaches etc., may participate. However, access to supporting learning material and the FIS e-learning platform is exclusive for FIS TD Candidates and FIS licensed TDs.

The seminars must be organized yearly in late autumn. All formats (in-person, on-line, hybrid) must include essentially the same content so that education is standard for all attendees. Typically, the material will be presented over a two-day period and could also include a prior evening for extra sessions.

The seminar must be organized and led by member(s) of the SBFSFK TD AG or an official member for regional aspects. At least one member of the SBFSFK TD AG must be present as a proctor. Provisional location and/or dates must be submitted to the SBFSFK TD AG before the spring meeting for approval and budget allocation (or before the Autumn meeting for the seminars planned in Spring).

The invitation and agenda of the approved FIS seminars must then be sent by the FIS Office to all NSAs as well as Licensed Technical Officials, Applicants and Candidates at least 20 days before. The organizer must send the list of the participants to the FIS SBFSFK Office, otherwise attendance credit will not be given.

The agenda, the presentations and videos prepared will be uploaded to the seminar folder on the FIS E-Learning Platform Moodle.

In the years where in the given region no FIS TD Update is organized, the members of the TD AG for this region can organize an online TD update following the Fall Meetings news. Online FIS TD Updates are valid for renewing the license in exceptional cases. The

invitation and agenda of the online FIS TD update seminars must be sent through the FIS SBFSFK Office to the same recipients.

### *3.2 Practical (In Service) Education and Training*

Beyond theoretical instruction, practical education and training—defined as active engagement in designated responsibilities during official events—constitutes an essential component in the development of Candidates and the ongoing qualification of licensed TDs. All practical training for Candidates is rigorously supervised, with detailed reports submitted to FIS to ensure thorough evaluation, constructive feedback, and continuous professional growth.

### *3.3 Assist Program*

The Assist Program is an integral part of the qualification process. This program allows candidates to apply their theoretical knowledge in real-world scenarios, under the mentorship of an experienced FIS TD. Currently, Assist Programs are primarily offered in developing regions, supporting candidates in fulfilling their in-service training requirements.

### *3.4 E-Learning*

The overall FIS education strategy considers a blended-learning approach. As such, all applicants, candidates and licensed TD have access to the FIS E-Learning Platform Moodle ([www.edu.fis-ski.com](http://www.edu.fis-ski.com)). Moodle is meant to provide a platform for self-regulated e-learning at the discretion of the user. Additionally, it supports the in-person and/or guided e-learning process with supplementary information and learning tools.

## **4. Governance of TD Education**

The TD structure comes under the responsibility of the Snowboard Freestyle Freeski Committee. The TD Advisory Group exercises this authority.
