208%

increase in FIS Development Program activities (2022–2026)

FIS Development Program Review

During the past Olympic and Paralympic Games cycle, the FIS Development Program has expanded significantly, increasing training opportunities for athletes and coaches through FIS

Development Training Camps. Ahead of the 2026/27 season, FIS Development will conduct a review together with the NSAs to further strengthen existing programs and

introduce new initiatives where strategically necessary, supporting the development of the next generation of skiers and snowboarders.
