1. General

This document provides an explanation of the protocol used for the FIS Data Exchange for start lists, intermediate results, results and standings.

Encoding should be in UTF8.

If optional elements are used (not empty) they should at least contain the required child elements.

Language for the content is English.

File name of the xml files: <NSA code><race codex (4 digits)>.xml

Example: AUT1234.xml

Result XML files can be sent as one file or also more than one file within one email. Files can be also sent packed in ZIP file. The ZIP should only contain the result file(s) but no folders or hidden system files.

Send the results to results@fis-ski.com.

Please note that the examples do not need to be correct in terms of data but should only show the XML structure.
