

Viessmann Award for Best CO₂ Emissions Reduction

Application Form – Award 2

1. Demonstrated Emissions Reductions	
What baseline did you use to assess emissions reductions? (e.g., previous editions of the event, comparable events, modeled reference) How much reduction (%) did you achieve in total CO ₂ emissions compared to your baseline? Please provide quantitative data demonstrating the reduction	
Were significant reductions achieved in specific categories (e.g., transport, energy, accommodation)? Please explain what was done and why.	
Did you improve emissions intensity (e.g., per participant, per event day, per activity)? Please provide evidence, even if the event scale or scope changed.	
<i>You may attach any additional references that you believe are relevant for this part.</i>	

2. Use of the CO₂ Calculator to Achieve Reductions	
How did insights from the FIS CO ₂ Calculator directly inform actions to reduce emissions?	
What concrete actions were taken to reduce emissions? Please describe.	

Were the emissions reductions from these actions measured using the CO ₂ Calculator? If yes, how?	
<i>You may attach any additional references that you believe are relevant for this part.</i>	

2. Credibility and Transparency of Reductions	
How did you ensure that the reported reductions are accurate and reliable?	
Were the data sources, assumptions, and methods clearly explained?	
<i>You may attach any additional references that you believe are relevant for this part.</i>	

Planned use of prize funds

Should your application be selected, please briefly describe how you would use the prize funds to support climate or environmental sustainability initiatives.
