Starting the software

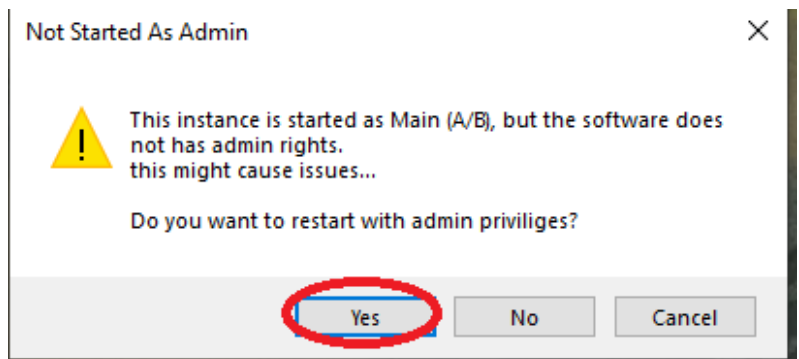

Run "Freestylesolution.exe"

PDFt Ruka EC ka	AnalyseOdfPRJ.exe	23/10/2024 12.06	Application	37 KB
Screenshots	DataChanges.exe	23/10/2024 12.06	Application	40 KB
Tietokannat Ruk	FindServer.exe	18/10/2024 13.22	Application	14 KB
OneDrive - Perso	FreestyleSolution.exe	23/10/2024 12.06	Application	1 393 KB
This PC	FreestyleTests.exe	23/10/2024 12.06	Application	54 KB
	FssLight.exe	23/10/2024 12.06	Application	381 KB
	FssMaster.exe	23/10/2024 12.06	Application	120 KB

Upon starting Freestylesolution.exe a window opens, where you can choose your database '.sdf' file. Please select Main A and click the 3 dots "..." to select the database of your competition. Then click "Connect to Database and Start". **This will start the Main Instance.**

Your computer may ask you to open the program with admin rights. Click "YES," and the program will open.

Working with Main and Client Instances

Do all the pre-event setup in the Main Instance (which you start by choosing “Main A”).

After assigning the start order, please close the Main Instance.

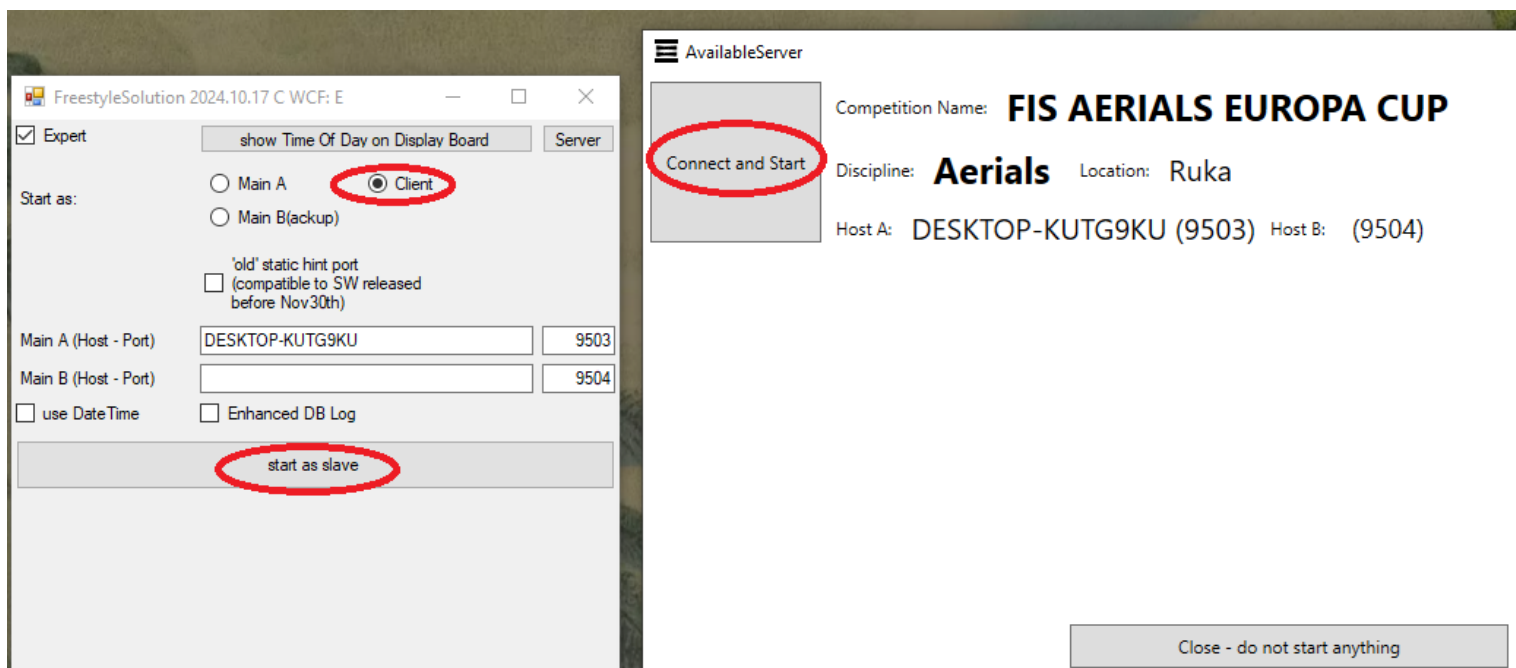

Then you may restart it and leave it running in the background but do not open any windows there.

Everything that is done during the competition (e.g. live scoring, online judging, pdf results, score validation, timing) should be opened in Client Instances.

You can start as many Client Instances as you like.

It is recommended to open a separate Client Instance for every task.

It is possible to utilize more than one computer for these operations. If the judges' tablets are set up (as in Europa Cup), you can add additional computers to the same network (via a switch) and run the Client Instances on them (see chapter Judges' Tablets).

- To start the Client Instance, run “Freestylesolution.exe” and choose “Client” instead of “Main A”
- A window pops up where you should click “Connect and Start”
- If this window does not appear click “start as slave”

Creating and Opening a Competition

Once you have clicked “Connect to Database and Start”, the event window will open. Here you can select your competition or create a new one.

If you have already created your competition, choose it and click "Start". To create a new competition, click “add Competition (Light)”.

After clicking “add Competition (Light)” a new window named "Add Competition" will open. Select the details, enter all your data and then click “save”.

The 'AddCompetition' window contains the following fields and options:

- Cup:** ☒ FIS Event, ☐ FIS similar Event, ☐ Interscholastic
- Discipline:** ☒ Ski Freestyle, ☐ Snowboard
- Discipline (sub-section):** ☐ Moguls, ☐ Dual Moguls, ☒ Aerials, ☐ Ski Cross, ☐ Half Pipe, ☐ Slopestyle, ☐ Big Air
- Competition Format:** ☒ FIS Format (1-2Q, 1-3F), ☐ 1-2Q (best), 1-3F (2 best), ☐ Dynamic Format, ☐ Olympic (2 Q, 2 F1 (best), 1 F2
- Event Date:** Friday, 13 December 2024
- Event Name:** FIS AERIALS EUROPA CUP
- Location:** Ruka
- Nation:** FIN
- Codex Ladies:** 0
- Codex Mens:** 0
- Buttons:** save, cancel

A red arrow points from the 'Codex Ladies' field to the 'Ruka Aerials EC' table in the adjacent screenshot.

The 'SelectCompetition' window displays a table of competitions:

ShortName	LongName
FIS FREESTYLE SKI EUROPA CUP MOGULS	FIS FREESTYLE SKI EUROPA CUP
FIS FREESTYLE SKI EUROPA CUP DUAL MOGULS	FIS FREESTYLE SKI EUROPA CUP

Buttons at the bottom: Start, Edit Competition, add Competition (Light), create Competitions from Online.

You can find the competition codices on the FIS website. Make sure you enter correct ones for women and men:

Ruka Aerials EC							
Status	Date	Codex	Event	Category	Gender	Run	Time
	13 Dec	8557	Aerials	EC	M		
	13 Dec	8558	Aerials	EC	W		
	14 Dec	8559	Aerials	EC	M		
	14 Dec	8560	Aerials	EC	W		

After creating a competition, choose it and click “Start”

The 'SelectCompetition' window shows the 'FIS AERIALS EUROPA CUP' competition selected in the table. The 'Start' button is highlighted with a red circle.

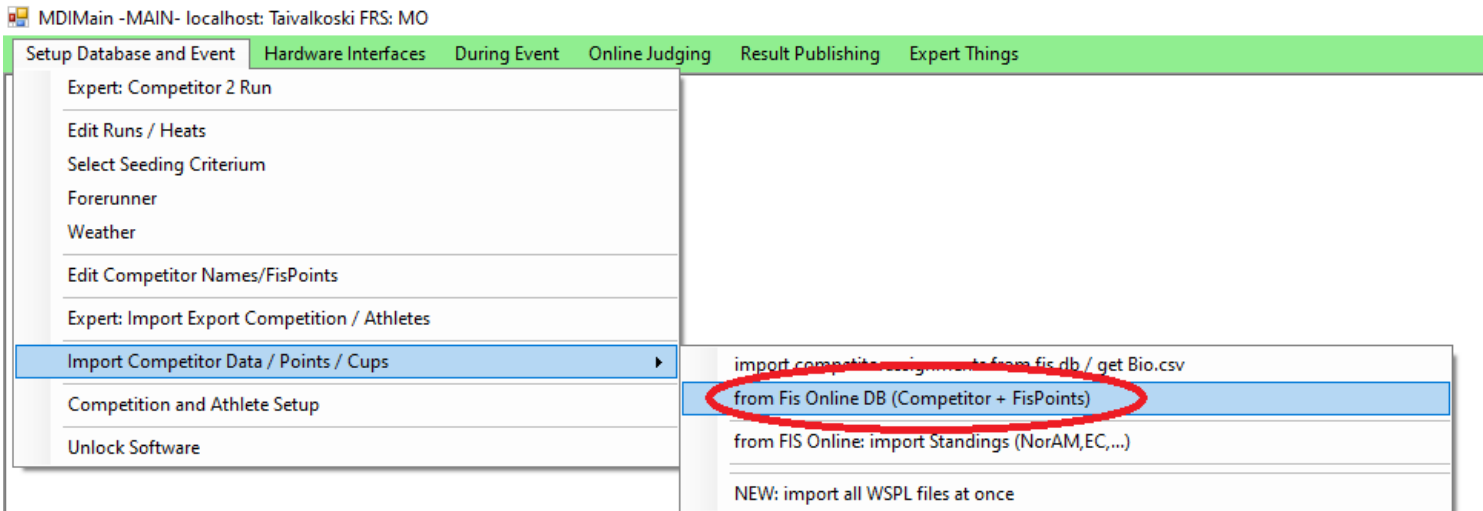

Import FIS Athlete Data

You need to import into the software the FIS athletes and their FIS points from the FIS database.

To import the FIS athletes and FIS points go to “Setup Database and Event”

-> “Import FIS Competitor Data/Points/Cups”

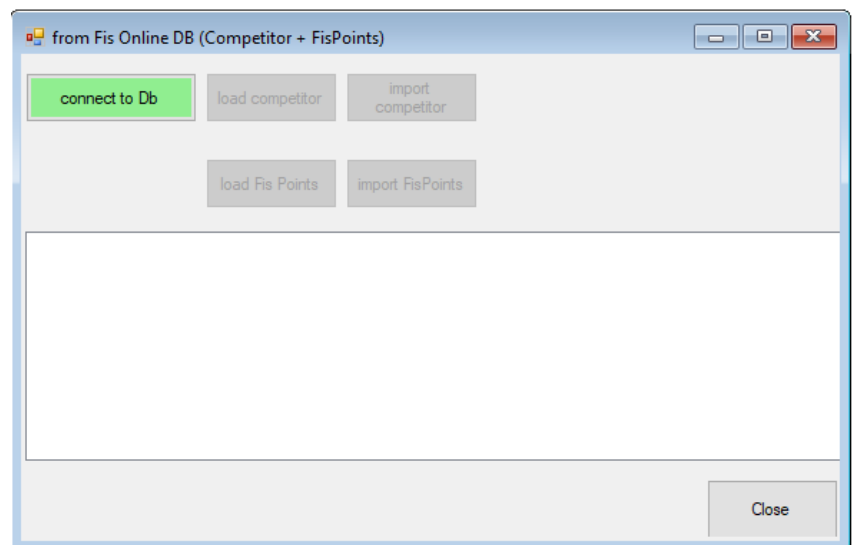

-> “from FIS Online DB (Competitor + FIS Points)”.

A new window will open. Make sure you are connected to the internet before proceeding with the next steps:

- “Connect to Db”
- “load competitor”
- “import competitor”
- “load FisPoints”
- “import FisPoints”

NOTE: Each step may take several minutes.

After completion of all the steps, click “Close” and restart the software.

Import Entries from FIS Online Entry System

In some competitions, for example in all Europa Cup events, you can get the entries from the FIS Online Entry System.

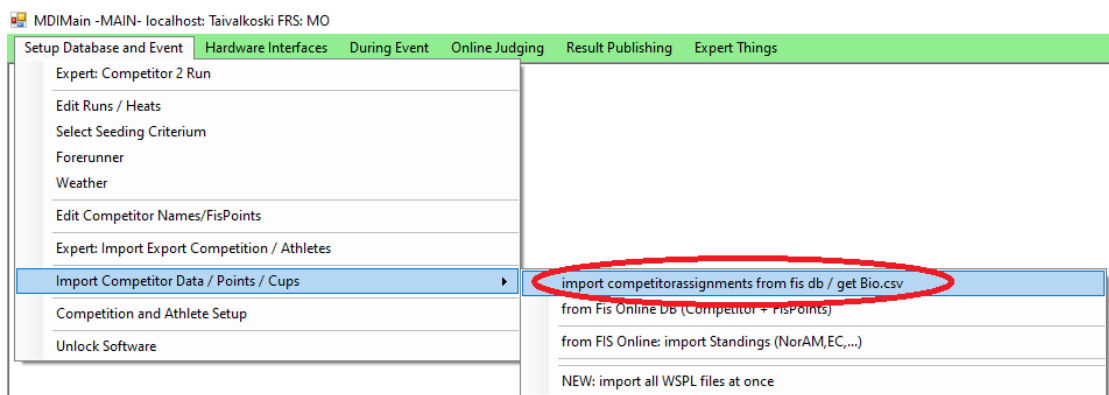

If you don't use the FIS Online Entry System for your event, see chapter Competition and Athlete Setup for how to add competitors.

You can download entries from the FIS Online Entry System as follows:

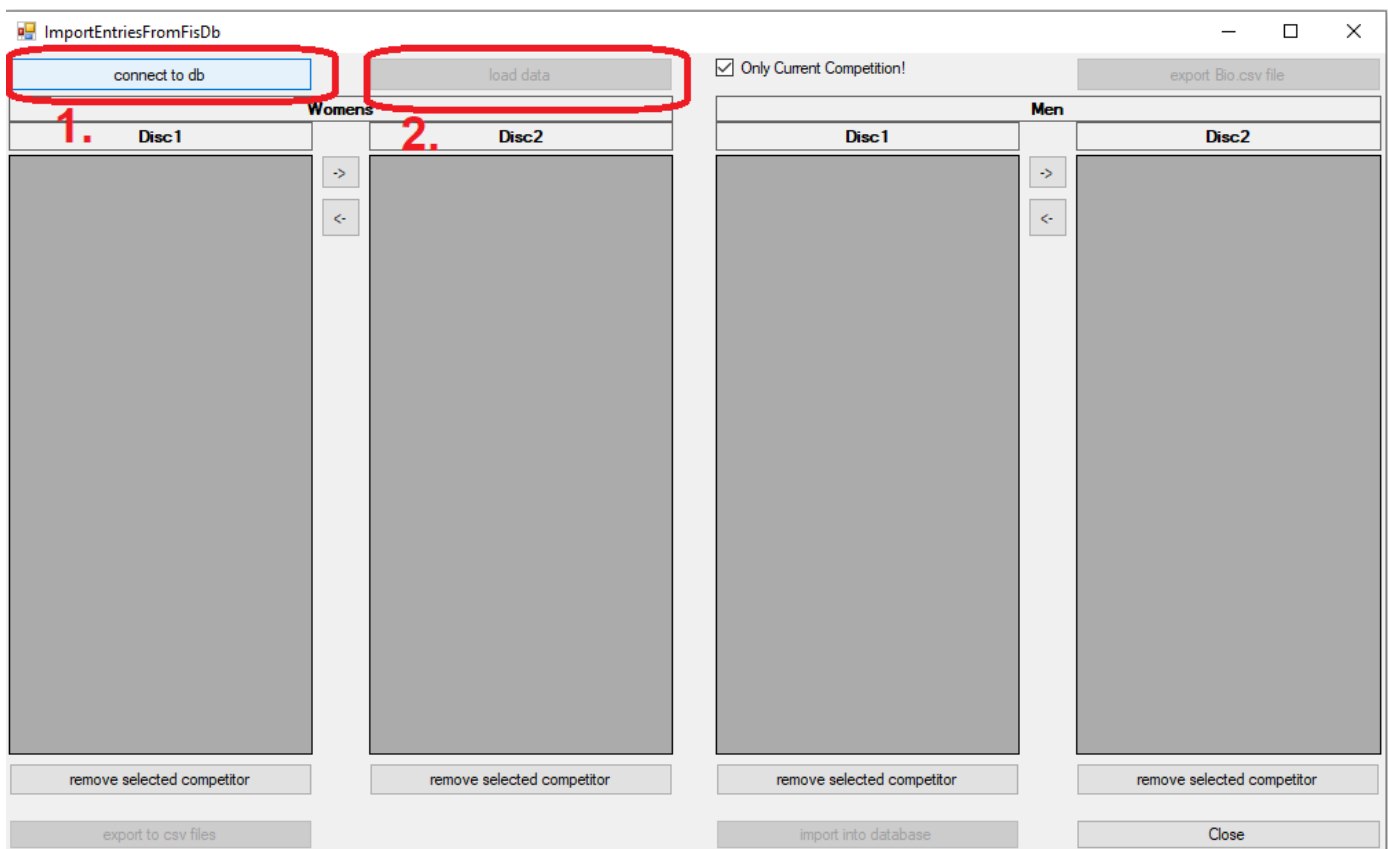

Go to "Setup Database and Event"

-> "Import Competitor Data/Points/Cup"

-> "import competitorassignments from fis db / get Bio.csv"

A new window titled "ImportEntriesFromFisDb" will open. Click "connect to db" and then "load data"

The entries will appear divided by gender. Click “import into database”.

Competition and Athlete Setup

Go to "Setup Database and Event"
-> "Competition and Athlete Setup"
A new window will open.

Competitor Data

The "Competitor Data" tab allows you to manage data related to the event's competitors. To maintain a clear overview of the athletes, they are separated by gender.

The "Bib" field displays the bib assigned to a competitor, while the "StartNr" field indicates the running order in the selected run.

On the top, you can choose the run you are viewing.

You can edit the competitor's information by double-clicking the respective athlete.

Save and Close

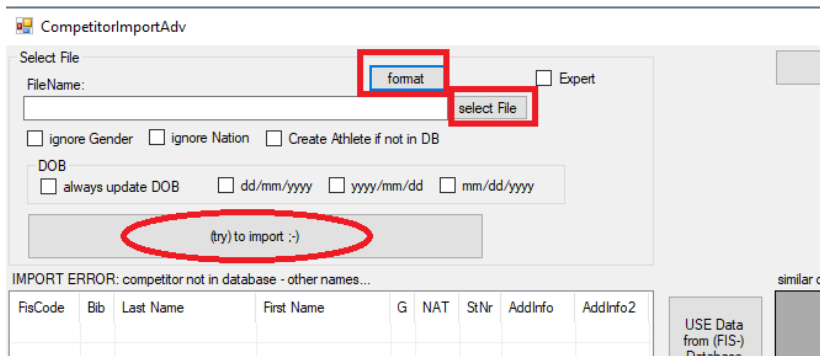

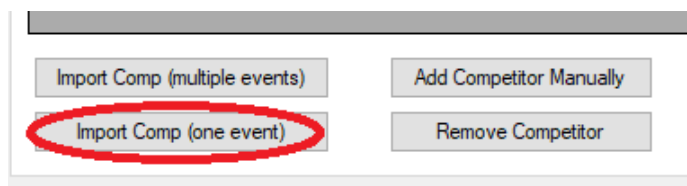

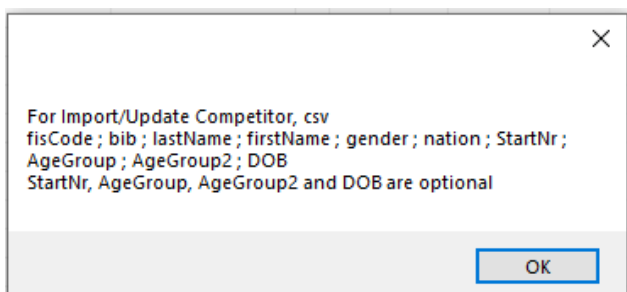

Import competitors from csv file:

If your event does not use the FIS Online Entry System, you can import entries from a csv file or add competitors manually.

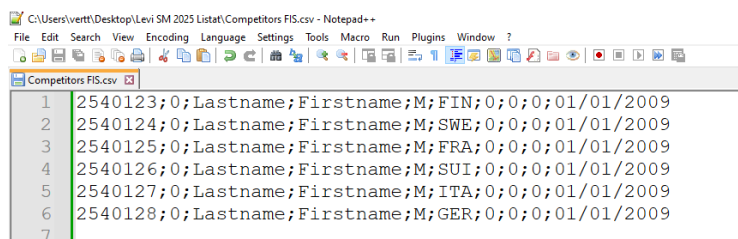

To import competitors from a csv file, click "Import Comp (one event)". Another window will open titled "CompetitorImportAdv".

First click "Select File" to choose the import csv file. Make sure this file is correctly formatted.

If you click "format" you will see how the import file should be formatted:

Example of an import file:

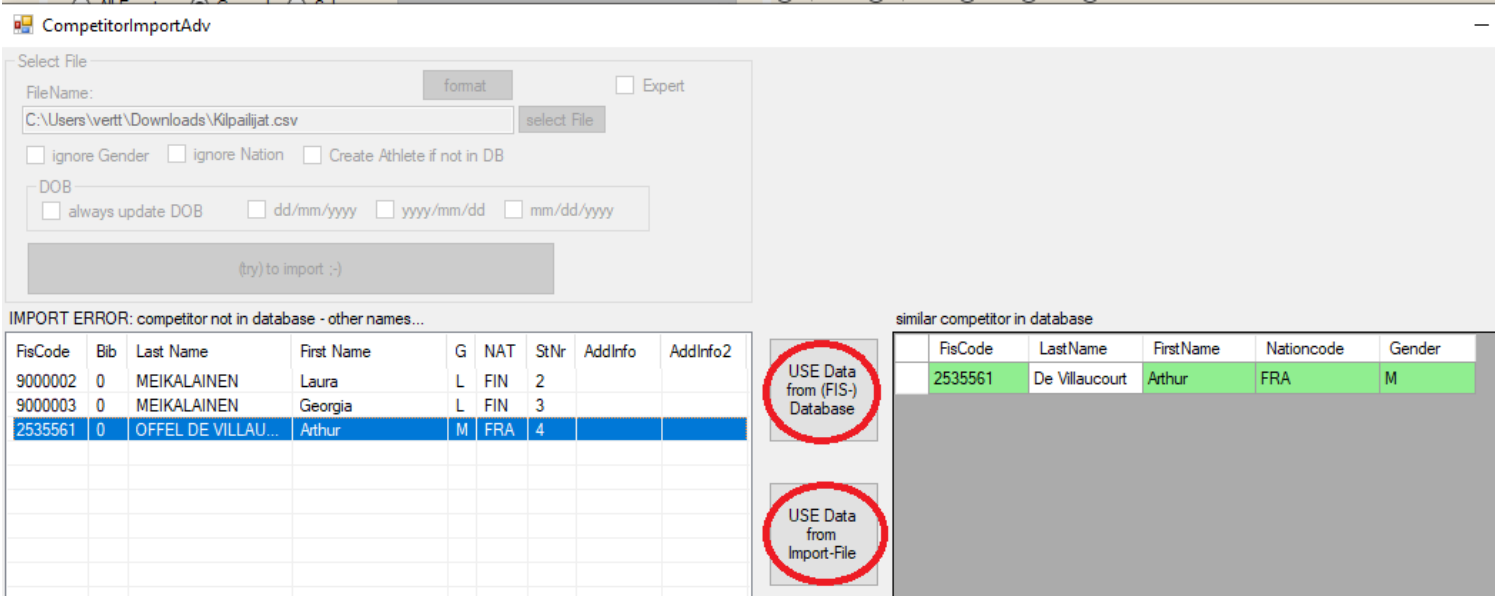

Click "(try) to import :-)" to start the import process.

The program goes through the import file and tries to match the data from your file to data from the FIS Database.

All competitors who are matched successfully will be assigned to the first run.

Those that could not be matched will appear on the list on the left.

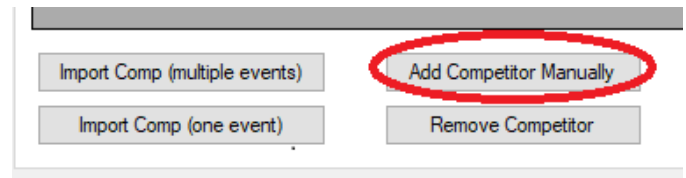

If an unmatched athlete has a FIS license, choose “USE Data from (FIS-) Database”

If an unmatched athlete **does not** have a FIS license but will compete anyway, in National Championships for example, choose “USE Data from Import-File”.

Add competitors manually

Occasionally, after the bulk of competitors have been imported, due to late entries etc., a competitor may need to be added. Instead of creating another import file you have the possibility to add competitors one by one by clicking the "Add Competitor Manually" button.

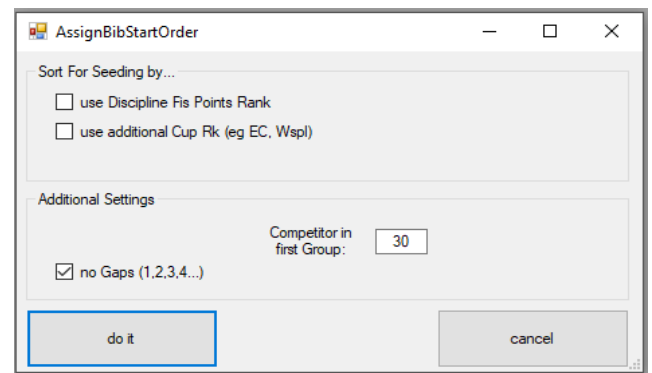

You can then search for a competitor from the FIS database or fill in the details manually (if the competitor doesn't have a FIS license).

Assign random bibs:

To assign random bibs to your competitors, click the "Assign Bib" button. Do not select any seeding details, just click “do it”.

NOTE: For assigning bibs in Continental Cup see chapter “Assign bibs in AE and MO/DM Continental Cup”.

Assign bibs manually:

If you want to assign bibs manually for every athlete, go to “Setup Database and Event” -> “Expert: Competitor 2 Run”. Choose gender and write in a bib field of the selected athlete

Expert: Competitor 2 Run

4	95	2537782	SEVERE, Rianna	USA

Assign random start order:

To assign a random start order click “Assign StartOrder”. Do not select any seeding details, just click “do it”.

NOTE: A random start order is used in aerials events (see ICR 4114).

NOTE: For assigning start order in Moguls Continental Cup, see chapter “Assign start order in Moguls Continental Cup”

The image shows a software interface for assigning start orders. At the top, there are three buttons: "Assign StartOrder" (highlighted with a red circle), "Assign Bib", and a dropdown arrow. Below these is a button labeled "use BIB as StartOrder". Below the buttons is a dialog box titled "AssignBibStartOrder". The dialog box has a section "Sort For Seeding by..." with four checkboxes: "use Discipline Fis Points Rank", "use additional Cup Rk (eg EC, Wspl)", "use Bib", "by Age Group ASC", and "by Age Group DESC". Below this is a section "Additional Settings" with a checkbox "override Bib with StartOrder" and a text field "Competitor in first Group:" with the value "30". At the bottom of the dialog box are two buttons: "do it" and "cancel".

General Event Data

The tab “General Event Data” lets you enter the course data, the judges, the competition mode and the officials.

The screenshot shows the 'Competition and Athlete Setup' window with the 'General Event Data' tab selected. The window is divided into several sections:

- Course Data:** Fields for Course Name (Taivalvaara), Course Length (200.0), Course Width (0.0), Gate Width (0.0), Gradient/Inclination (24), min/max FIS Points (0, 0), and Place / Nation (Taivalkoski, FIN). A 'Calc Pace' button is present.
- Judges & Scoring:** A section for 'No of Judges' (7) and a 'change NoOfJudges' button. Below is a table of judges.
- Competition Mode:** Fields for 'Ladies' and 'Men' competition modes, including 'Quali Runs' and 'Final Runs' options. A 'Reverse Q2 StartOrder' checkbox is also present.
- Officials / Jury:** A table listing officials with columns for Name, Nation, Function, Order, and Print.

Course data in Moguls:

Once you have entered the course measurements click "Calc Pace". On the right will you will the pace time for each gender. The FIS Technical Delegate should provide you with all the measurements.

This screenshot shows the 'Course Data' tab for Moguls. The 'Calc Pace' button is circled in red. The fields are filled with data for the 'Levi Moguls Course'.

Field	Value
Course Name	Levi Moguls Course
Course Length	243.0
Course Width	0.0
Gate Width	0.0
Gradient/Inclination	23
min/max FIS Points	0, 0
Place / Nation	Levi, FIN

Pace Time Ladies: 9.0 m/s 27.00
Pace Time Men: 10.3 m/s 23.59

Course data in Dual Moguls:

In dual moguls, you also have settings regarding seeding the brackets. Usually, you only need to choose between two of them, either “Quali is used to seed Brackets” or “no Quali, seed by SeedCriteria”.

Details regarding seeding by “seed criteria” are explained in the chapter of the manual “Dual Moguls Seeding by Seed Criteria”.

This screenshot shows the 'Course Data' tab for Dual Moguls. The 'Calc Pace' button is circled in red. The fields are filled with data for the 'Taivalkoski' course. At the bottom, there are radio buttons for seeding criteria.

Field	Value
Course Name	
Course Length	200.0
Course Width	0.0
Gate Width	0.0
Gradient/Inclination	24
min/max FIS Points	0, 0
Place / Nation	Taivalkoski, FIN

Pace Time Ladies: 9.0 m/s 22.22
Pace Time Men: 10.3 m/s 19.41

Seeding Criteria:
☐ Quali is used to seed Brackets
☐ no Quali, seed by Bib
☐ no Quali, seed by Fis RK
☐ no Quali, seed by best of Fis RK, WC / NAC / EC / WCSL
☒ no Quali, seed by SeedCriteria

Course data in Aerials:

In Aerials you can enter the specs of the kickers. The FIS Technical Delegate should provide you with all the measurements.

Unlocking the Software

After creating a competition, you need to unlock the software. This must be done for every competition in a database. Go to “Setup Database and Event” -> “Unlock Software”.

A new window will open. Choose “Unlock Online (Username and Password needed)” and write in Username: **karin.arnold@fis-ski.com** and Password: **ElvisIsInTheHouse** Then click “check / request unlock key”.

Be aware there's a loading process that lasts a few seconds, after which you will see a message “Successfully unlocked”. Then simply click “ok”.

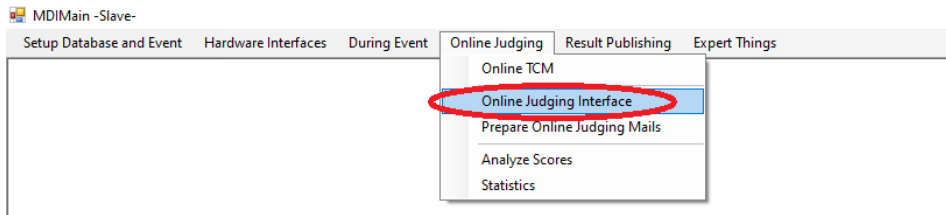

If unlocking doesn't work, please send an email to Karin Arnold: **karin.arnold@fis-ski.com**.

Online Judging

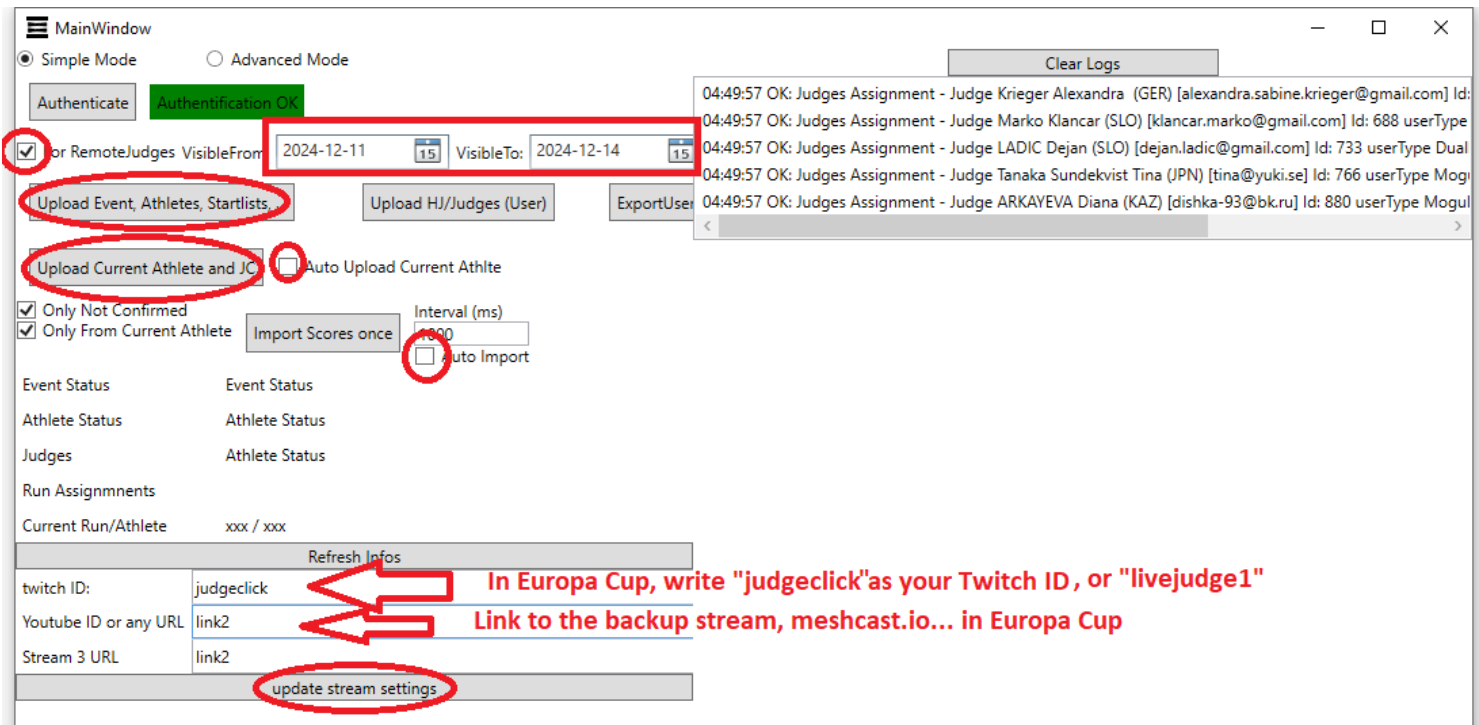

NOTE: To use online judging, you must first enter the judges' usernames in "Setup Database and Event" -> "Competitor and Athlete Setup" -> "General Event Data" as described earlier in the manual.

Every Europa Cup and World Cup judge has a username.

For setting up online judging, select "Online Judging" -> "Online Judging Interface". A new window will open.

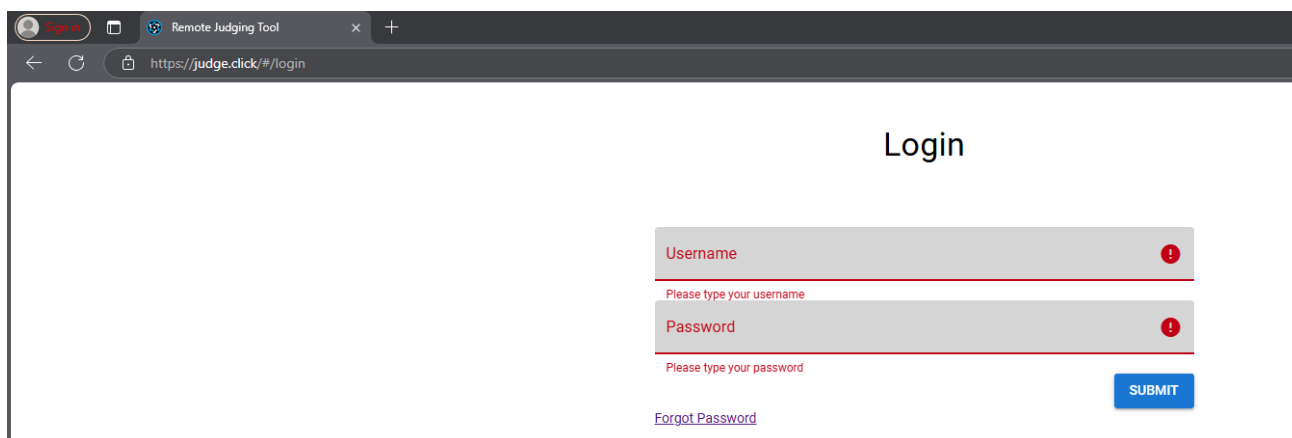

- click "Authenticate"
- check the box "for Remotejudges VisibleFrom:" and set the dates when you want the competition to be visible (it is recommended to select from a day before the competition till a day after).
- click "Upload Event, Athletes, Startlist,..."
- check the box for "Auto upload Current Athlete"
- check the box "Auto import"
- set the Twitch streaming ID and/or backup stream and click "update stream setting"

When you've set up the online judging system, you can check if it's working by visiting the web page <https://judge.click/#/login>

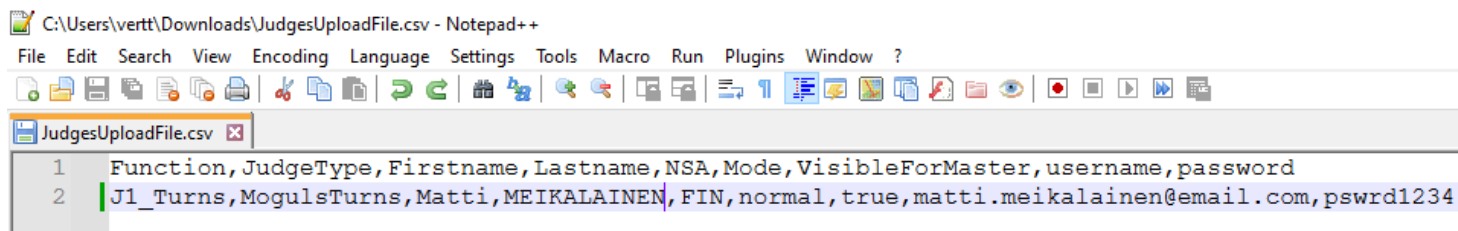

Log in with these
credentials:
Username: LLTest
Password:
LLTestPassword

Create a new username and password

You might work in a competition, in National Championship for example, where a judge is not a Europa Cup or World Cup judge and has no username for judge.click. In these cases, you need to create a username and password manually. Follow these instructions.

Create a csv file like the example below. Make sure you have all the fields.

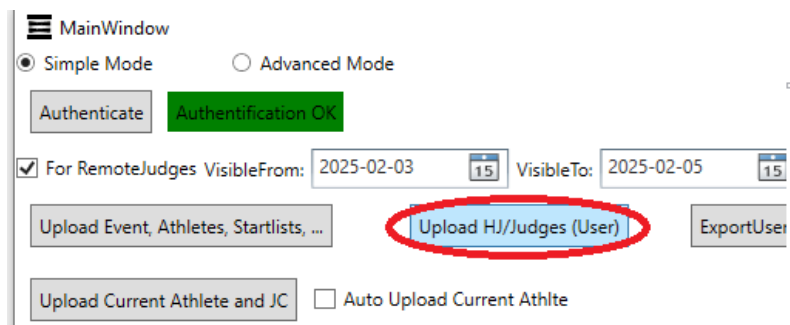

```
1 Function, JudgeType, Firstname, Lastname, NSA, Mode, VisibleForMaster, username, password
2 J1_Turns, MogulsTurns, Matti, MEIKALAINEN, FIN, normal, true, matti.meikalainen@email.com, pswrd1234
```

You may choose "J1_Turns" for function and "MogulsTurns" for JudgeType, even though that wouldn't be the judge's assignment. You can change the assignment later.

Click "Upload HJ/Judges (User)" in the "Online judging Interface" window and upload the csv file.

After the previous steps, go to
"Setup Database and Event"
-> "Competitor and Athlete Setup"
-> "General Event Data"
and enter judges' username and details
assigned for the correct judge number.

Online TCM

NOTE: If you have two qualification runs in an aerials event you must assign all competitors to both runs before the Online TCM. Otherwise, you cannot import jump codes for the second run. See chapter “Change bibs, assignments and start orders manually” for how to do the assignment to the 2nd qualification.

Go to “Online Judging”

-> “Online TCM”. A new window will open.

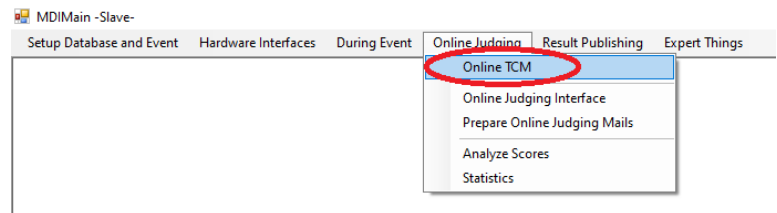

→ click “Authenticate / Login”

→ select “Confirmation Meeting” for “Template”

→ click “Save Settings”

→ click “Upload to Server”

→ click “Send E-mails” and select a .xlsx file with the nations and the respective emails (usually coaches’ emails).

Every nation will receive an email with a link to confirm or scratch athletes.

Remind the teams to check their emails, in a whatsapp group for example.

● Partly Confirmed
● Not Confirmed

Coaches' emails file example:

L18					
	A	B	C	D	E
1	nation	email			
2	SUI	firstname.lastname@swiss-ski.ch			
3	CAN	coach@freestylecanada.ski			
4	CZE	coach@czeski.com			
5	AUS	firstname.lastname@skifederation.org			
6	UKR	firstname.lastname@gmail.com			
7	CAN	coach@freestylecanada.ski			
8	GER	firstname.lastname@gmail.com			
9	USA	coach@usaski.com			
10	JPN	coach@outlook.jp			
11	FIN	firstname.lastname@gmail.com			
12	SUI	coach2@swiss-ski.ch			

When all nations have confirmed or scratched their athletes (you can see them marked green if you access the overall link) click "Import into SW".

NOTE: In an Aerials event, the coaches can enter jumps codes. To enable this, click on "Upload Comment Fields/TeamNr" **before** sending the emails. When all the teams have confirmed their entries click "Import Jump Codes".

After clicking "Import into SW" go back to "Setup Database and Event" → "Expert Competitor 2 Run", another window will open.

Here you will see athletes' confirmation status, "TcmConfirmed" or "TcmScratched".

You must remove the scratched athletes manually. Right click an athlete and choose "Remove selected Competitor"

NOTE: If you have two qualification runs in aerials, remember to remove scratched athletes from both runs.

Aerials with on-site judging

If you don't use online judging or the tablets, go to "During Event" -> "Current Run and Scoring". A new window will open.

Here you can enter all the scores manually. The view here is like the one in moguls, except there's not a field for time. See the previous subchapter "Single Moguls with on-site judging" for more detailed instructions.

The screenshot shows the 'Current Run and Scoring' window. The 'Run' section is highlighted with a red box, showing 'Men' selected and 'Phase' set to 'ALL'. The 'Current Competitor' is '28 DUCHAINE Alexandre'. The 'AEMO' section has an 'OK' button. The 'Status' dropdown is set to 'OK' and is highlighted with a red circle. The 'CONFIRM SCORE' button is also highlighted with a red circle. The 'Reset Scores' button is visible. The 'Jump' field is empty. The 'Auto Jump to Next Competitor in 1 seconds.' checkbox is checked. The 'Quali -> Final' section has 'Progr Next Run' and 'Progr Next Phase' buttons. The 'Reset Run' button is also present. The results table shows the following data:

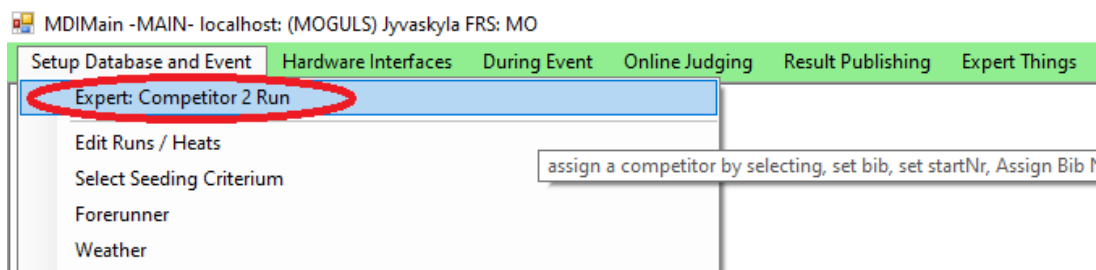

Rank	Bib	Name	Score1	Score2	Score3	Total	AgeGroup
7	28	DUCHAINE Alexandre	109.75	103.12		109.75	
8	29	FONTAINE Miha	81.81	109.38		109.38	
9	48	KUSHNIR Volodymyr	101.46	105.70		105.70	
10	26	COTE Pierre-Olivier	101.08	105.70		105.70	
11	52	OKIPNIUK Oleksandr	98.42	71.28		98.42	
12	34	PRIMEAU Victor	95.17	93.76		95.17	
13	27	DION Gabriel	83.22	90.72		90.72	
14	32	NOEL Anthony	64.75	80.20		80.20	

Change bibs, assignments and start orders manually

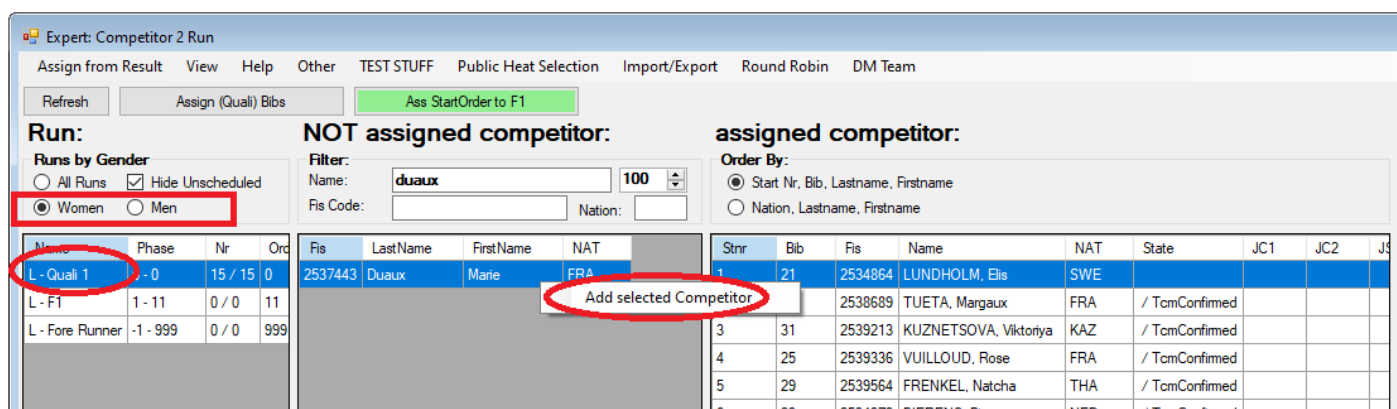

Sometimes you need to make changes to bibs, run assignments or start orders manually before or during a competition. The fastest way to make these kinds of changes is window "Expert: Competitor 2 Run"

Go to "Setup Database and Event"

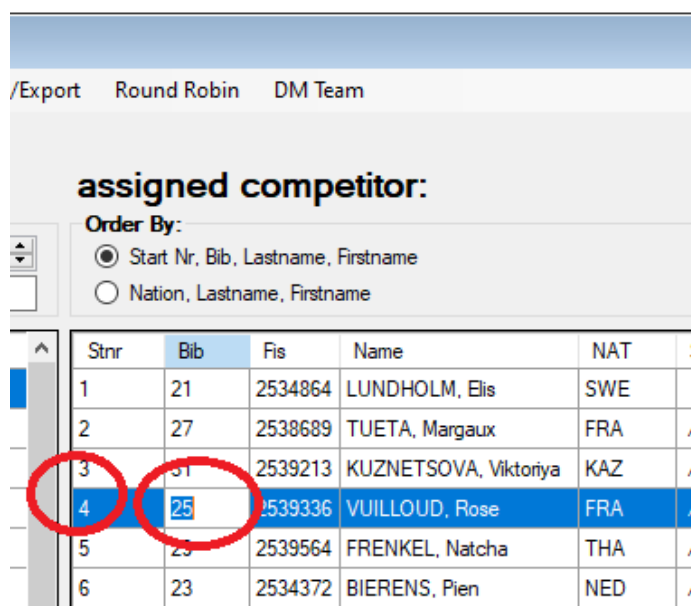

-> "Expert: Competitor 2 Run"

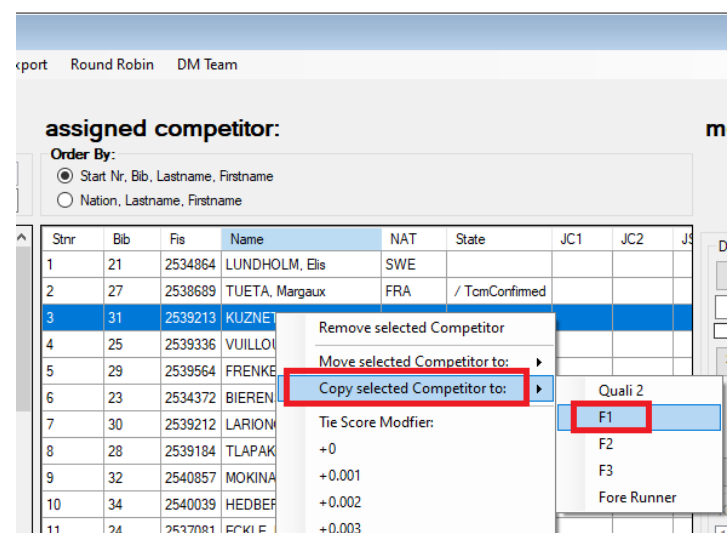

Always select the gender and run first. By using the search feature, you can search for and add competitors to a selected run.

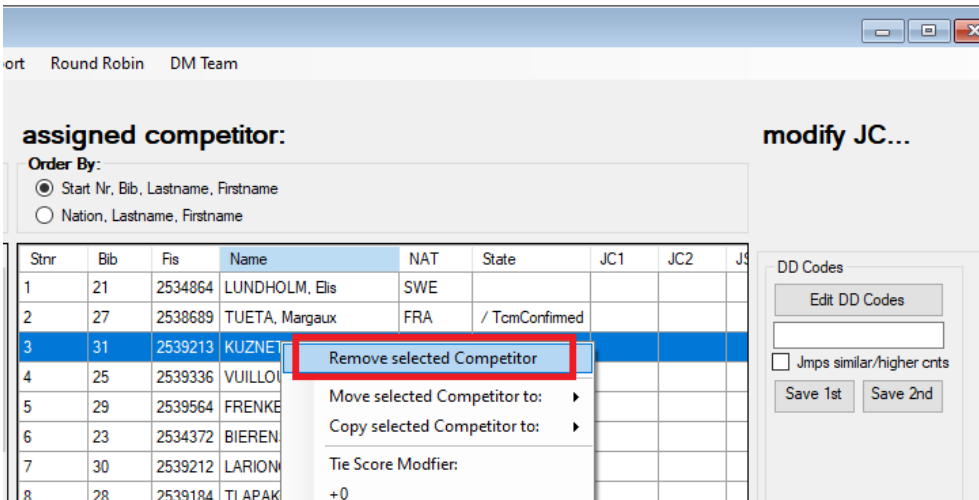

By double clicking a bib or a start number you can change them for the selected athlete.

By right clicking a selected athlete you can copy or move them to another run. In Duals Moguls you can assign the athlete to another position in the brackets.

By right clicking an athlete you can also remove them from the selected run.

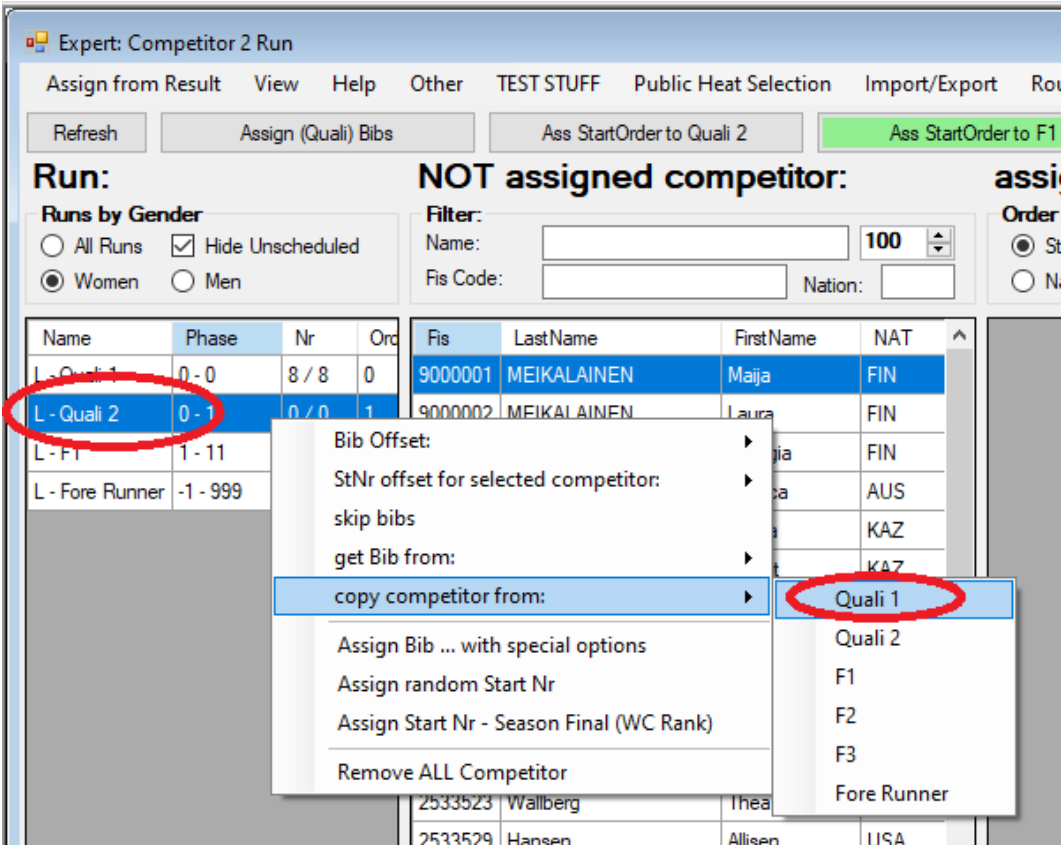

Copy competitors to 2nd qualification run in Aerials

In an Aerials event with two qualification runs you must assign competitors to the 2nd qualification run before the Online TCM.

NOTE: You should assign the bibs before proceeding with these steps.

- select the 2nd qualification run from the list on the left
- right click and choose “copy competitor from:” and “Quali 1”

Creating and running a test event

To familiarize yourself with the program, you can create and run a test competition. A test competition is basically created and run as any event. Here are a couple of tips.

When you create the test competition you can enter a “fake” competition codex.

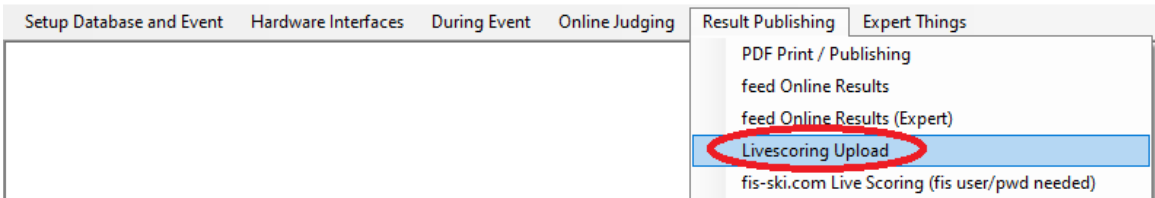

NOTE: Don’t use the same codex as any ongoing freestyle competition at the same time.

In the window “During Event”
-> “Current Run and Scoring” you will find “test buttons” to generate random scores.

With online judging or judges’ tablets you should use window “During Event”
-> “Current Run and Scoring – Advanced User, needed for OnlineJudging”.

There you can also find buttons to generate times and scores for testing purposes.

Live Results

To set up the live scoring go to "Result Publishing" -> "Livescoring Upload".
A new window will open.

Click "init and try connect"

-> "publish Competition"

-> "Upload Startlists/Results"

During the competition, turn on auto upload by clicking "Auto Upload Startlist/Results"

NOTE: You can edit "Event Identifier" if you want to. Then the live scoring link will also change. But if you close and re-open this window, you just need to write in your custom event identifier again.

A screenshot of the 'Livescoring Upload' window. It contains several input fields and buttons. The 'Event Identifier' field is filled with 'TaivalkoskiDM'. Below it is an 'Event Header' field. The 'Competition Name' field is empty. The 'Full Event Link' field contains 'https://fis.live-scoring.com/TaivalkoskiDM'. There are four buttons: 'init and try connect', 'publish Competition', 'Reset Competition', and 'Upload Startlists/Result'. A fifth button, 'Auto Upload Startlist/Results', is highlighted in yellow. The 'Status' field is empty. The 'Force Background Colors' checkbox is unchecked.A close-up screenshot of the 'Full Event Link' field. The text 'https://fis.live-scoring.com/TaivalkoskiDM' is visible in the input box.

Under "Full Event Link" you will find the live scoring link the software generates for the competition. Share it with anyone who wants to follow live results from your competition.

NOTE: If you lose your internet connection for a moment, you should reconnect to the live scoring server and click “Upload Startlist/Result”.

It's advisable to keep the live scoring link open during the event and follow it to see if it's working correctly.

NOTE: Do not run live results upload during training, to avoid uploading any training scores by mistake.

Dual Moguls Seeding by Seed Criteria

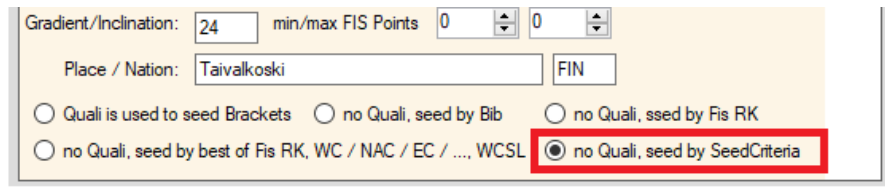

This chapter explains how to seed dual moguls when you start with competing pairs in the beginning and there's no qualification.

Go to "Setup Database and Event"

-> "General Event Data"

-> "Course Data"

Make sure you have selected
"no Quali, seed by SeedCriteria"

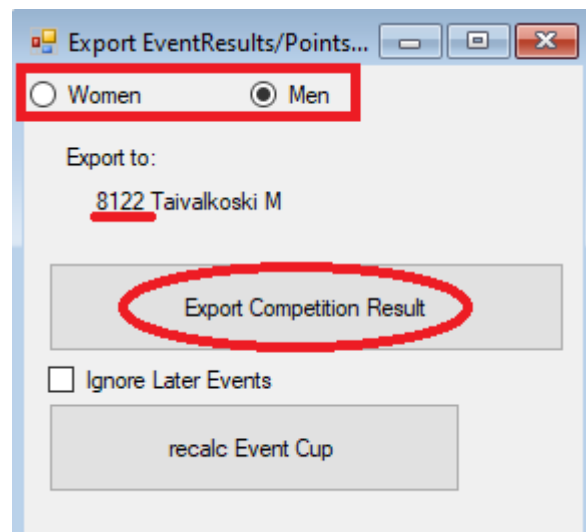

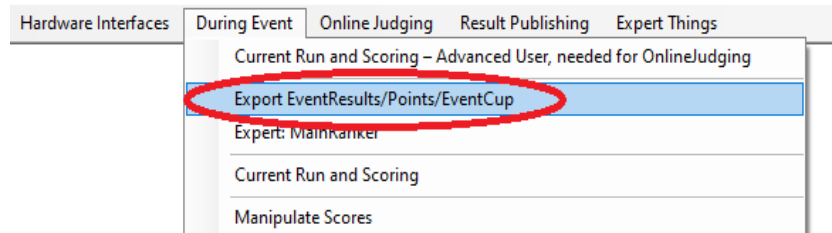

Export Single Moguls Result

If you have an MO competition in the same event you need to export results from that competition. You need to have the MO competition open in the program when you do this.

NOTE: You should have both DM and MO competitions in the same database to do this.

Go to "During Event" -> "Export EventResult"

Another window will open. Select gender and click "Export Competition Result". Make sure the competition codex is correct.

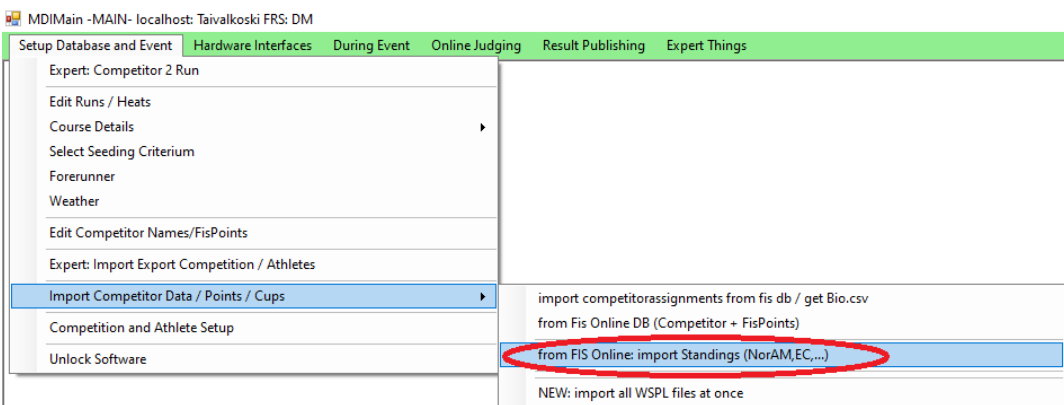

Import Dual Moguls Cup standings

Open the Dual Moguls competition. If your event is part of Continental Cup, you must import the current cup standings. If your event is not part of Continental Cup, you can skip this step. If your event has the first duals competition of the season and there's no cup standing yet, you can also skip this step.

Go to "Setup Database and Event"

-> Import Competitor Data / Points / Cups"

-> "from FIS Online: import Standings (NorAM,EC,...)"

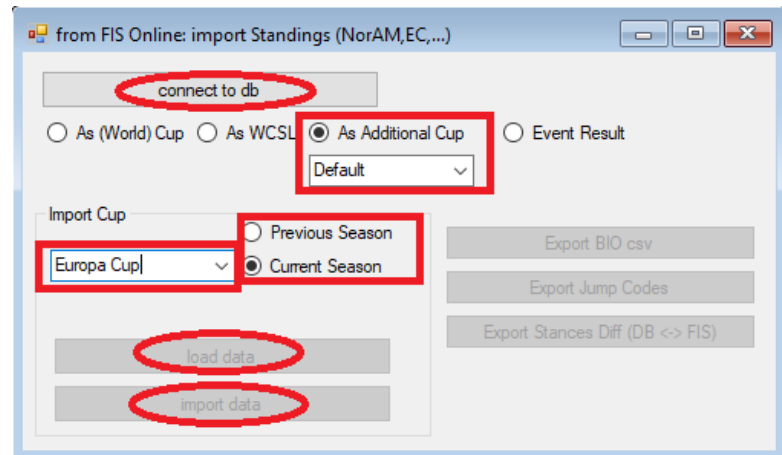

Another window will open.

- Click "connect to db".
- Choose "As additional cup" and "Default" *
- Select your cup and season
- Click "load data" and "import data"

NOTE: After the import, restart the software.

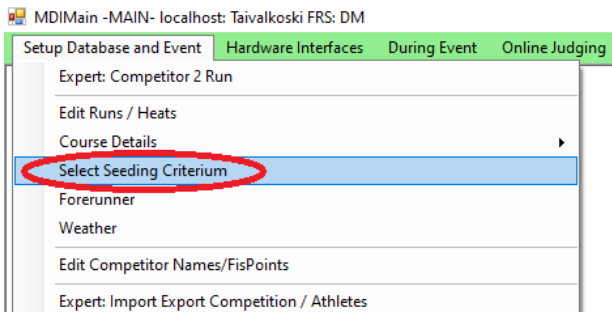

* **NOTE:** If this does not work, choose "As (World) Cup" instead of "As additional Cup" and "Default"

Select Seeding Criteria

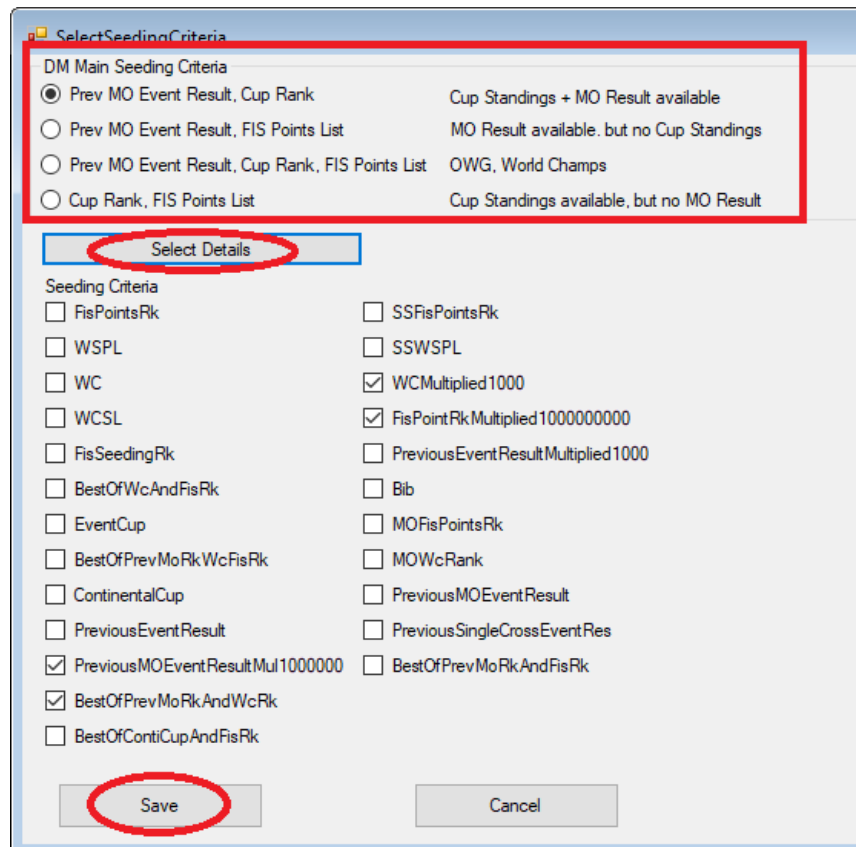

Then you need to select the seeding criteria.

Go to "Setup Database and Event"
-> "Select Seeding Criterium"

A new window opens titled
"SelectSeedingCriteria"

- Select the seeding criteria you need
- click "Select Details"
- click "Save"

Which seeding criteria to choose for Dual Moguls?

Europa Cup:

In the first duals event of the season, choose "Prev MO Event Result, FIS Points List"

In later events:

- Choose "Prev MO Event Result, Cup Rank"
- If there's no MO competition in the event choose "Cup Rank, FIS Points List"

Other Continental Cups:

Consult your Race Director.

Other FIS competitions:

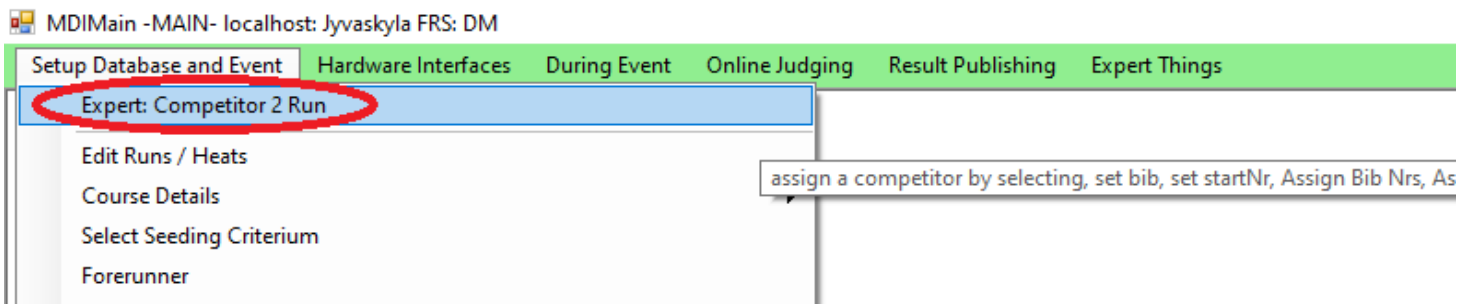

- Choose "Prev MO Event Result, FIS Points List"
- If there's no MO competition in the event, choose the same as above. The program will then use only FIS points.

Assign Brackets by Seeding

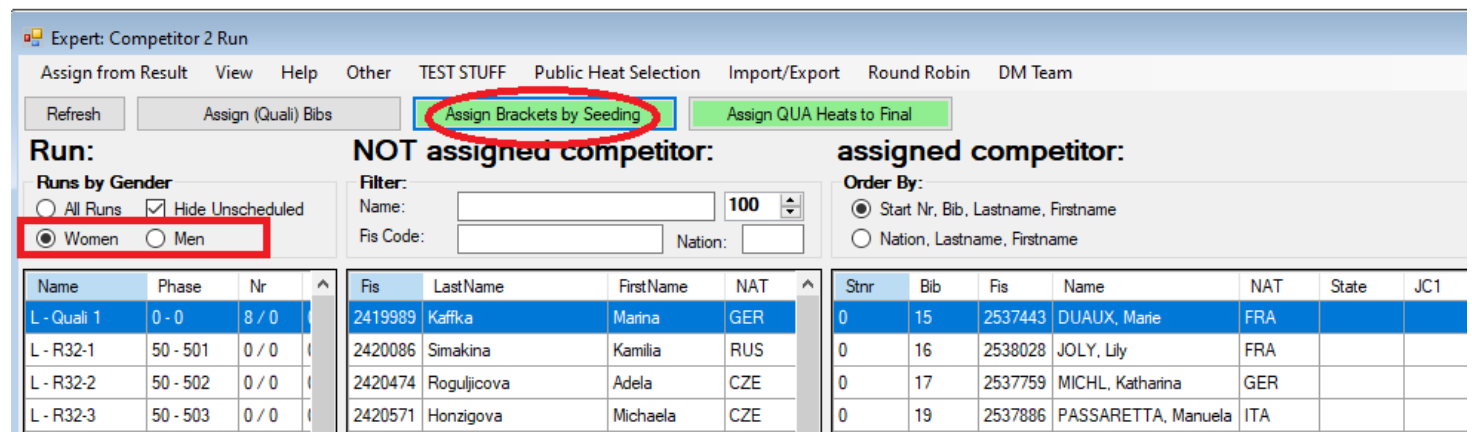

After completing the previous steps, you can finally assign the brackets.

Go to "Setup Database and Event"

-> "Expert: Competitor 2 Run"

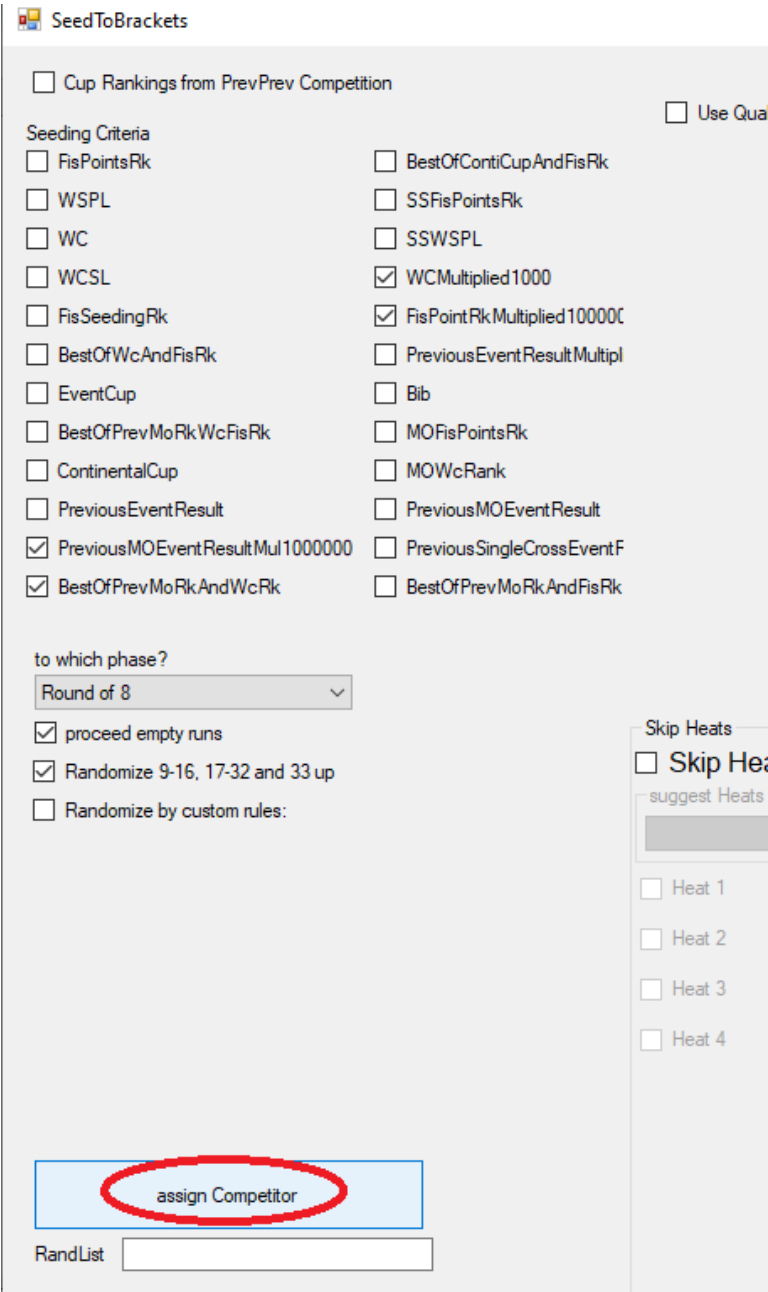

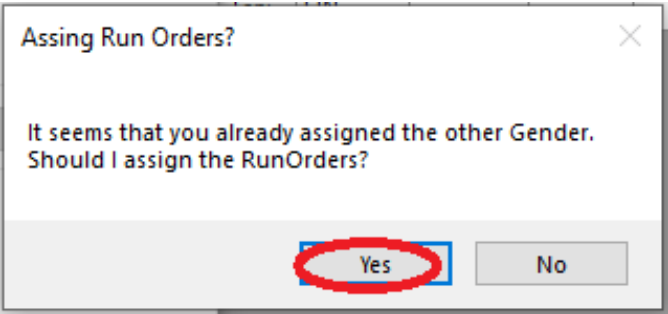

Select a gender and click "Assign Brackets by Seeding"

A new window opens titled “SeedToBrackets”.

- You **don’t** need to change or select any criteria in this window.
- Just click “assign Competitor”.

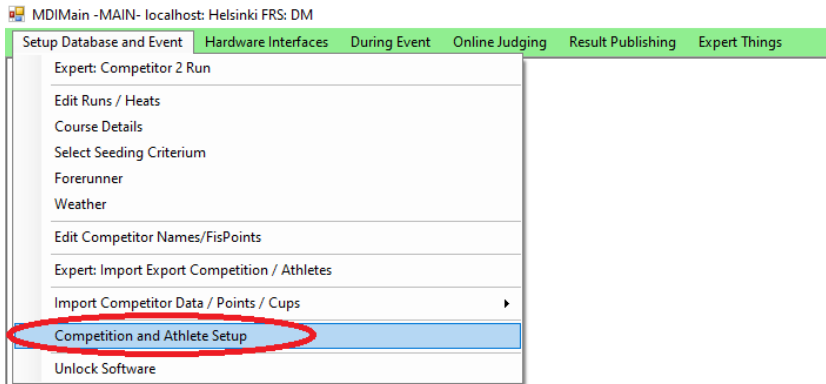

After you have assigned the brackets for both genders, the program will ask you if you want to assign run orders. Choose “Yes”.

Dual Moguls Seeding by Single Moguls Qualification

This chapter explains how to seed dual moguls with a single moguls qualification round.

Go to "Setup Database and Event" -> "Competition and Athlete Setup"
Open tab "General Event Data"

In the section "Course Data" select "Quali is used to seed Brackets"

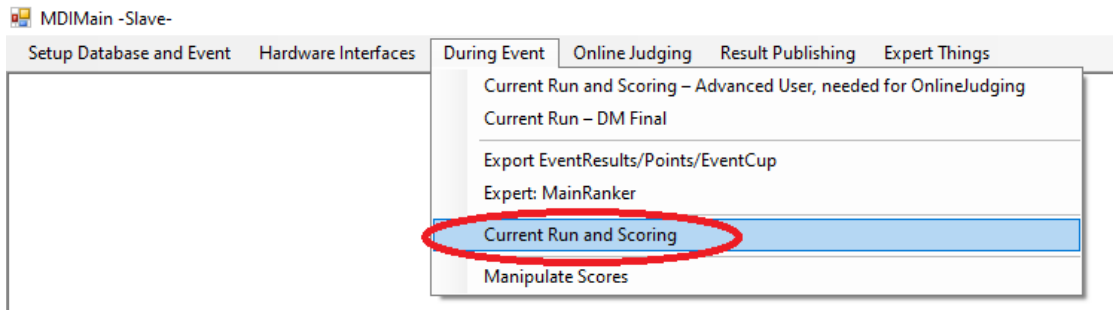

The screenshot shows the "Course Data" form. It contains various input fields for course information: "Course Name", "Course Length" (0.0), "Course Width" (0.0), "Gate Width" (0.0), "Gradient/Inclination", "min/max FIS Points" (0), "Place / Nation" (Helsinki), and "FIN". There are also fields for "Pace Time Ladies" (9.0 m/s 0.00) and "Pace Time Men" (10.3 m/s 0.00). A "Calc Pace" button is located between the length and width fields. At the bottom, there are five radio button options for seeding: "Quali is used to seed Brackets" (selected and highlighted with a red box), "no Quali, seed by Bib", "no Quali, ssed by Fis RK", "no Quali, seed by best of Fis RK, WC / NAC / EC / ..., WCSL", and "no Quali, seed by SeedCriteria".

In the section "Competition Mode", you need to define how many athletes will proceed from qualification to final brackets.

The screenshot shows the "Competition Mode" form. It has a "General Competition Mode" section. Under "Ladies Qualification", there are radio buttons for "1 Run" (selected), "2 Runs", and "no Quali". Under "Men Qualification", there are radio buttons for "1 Run" (selected), "2 Runs", and "no Quali". There is a checkbox for "Reverse Q2 StartOrder". Below these, there are two radio buttons: "Overall" (selected) and "by Age Groups". At the bottom, there are two input fields: "Ladies Qualification to Finals" with the value "16" and "Mens Qualification to Finals" with the value "32". Both of these fields are highlighted with red boxes.

Once you're done with the setup you can proceed with the qualification as in any moguls competition. See chapter During Event for details, e.g. how to assign start orders, bibs etc.

After the qualification round, go to "During Event" -> "Current Run and Scoring". A new window will open. If you don't have online judges or judges' tablets, you should be already working in this window.

To assign the brackets, choose "Progr Next Phase". Then you can proceed with the rest of the competition.

Current Run and Scoring

Assign bibs in AE and MO/DM Continental Cup

In Continental Cup events bibs should be assigned by Cup standings. In the first event of the season, when standings are not yet available, the FIS points list should be used instead.

The top 25 competitors will get their bibs according to the standings. The rest of the athletes get randomized.

NOTE: If you use the FIS point list to assign the bibs, see chapter “Import FIS Athlete Data” on how to import FIS points. Complete those steps before you proceed with the bib assignment.

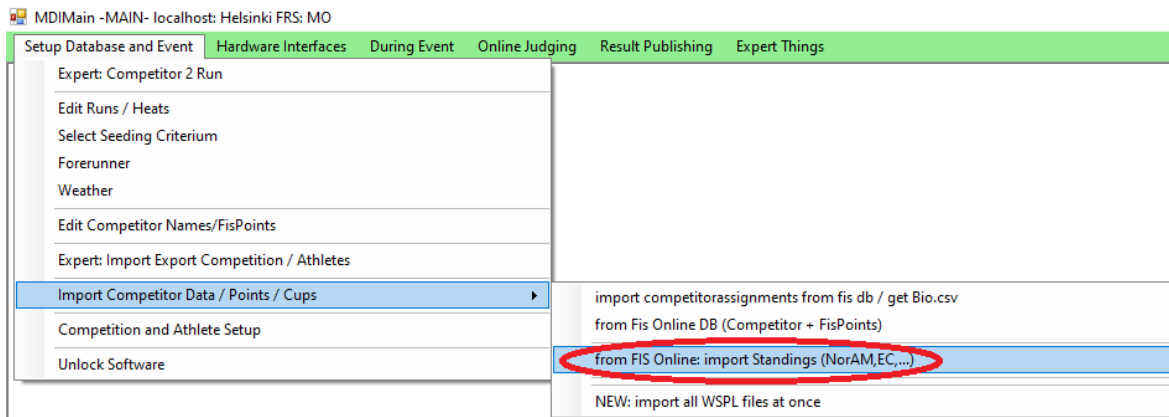

If you use cup standings, follow these instructions for cup standings import:

Go to “Setup Database and Event”

-> “Import Competitor Data / Points / Cups”

-> “from FIS Online: import Standings (NorAM, EC, ...)”

A window opens.

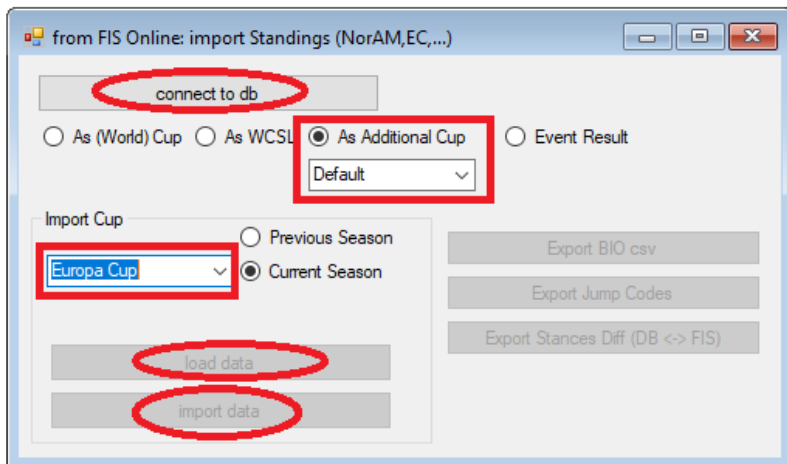

- Select “As Additional cup” and “Default”.

- Select your cup, “Europa cup” for example

- Click “connect to db”

-> “load data”

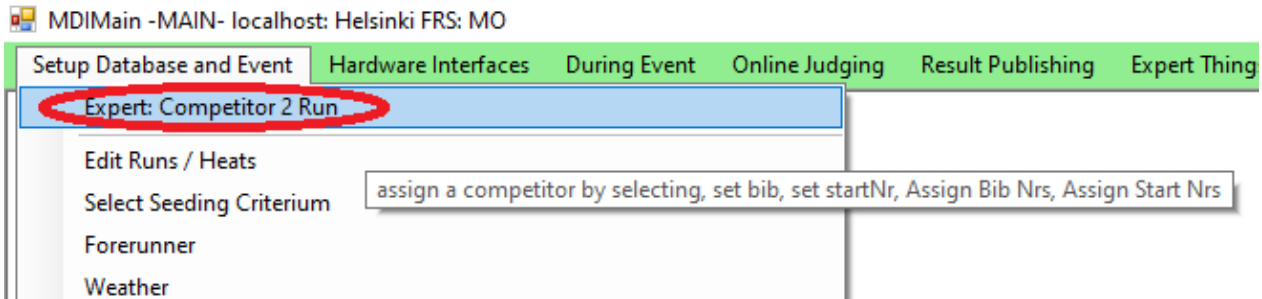

-> “import data”

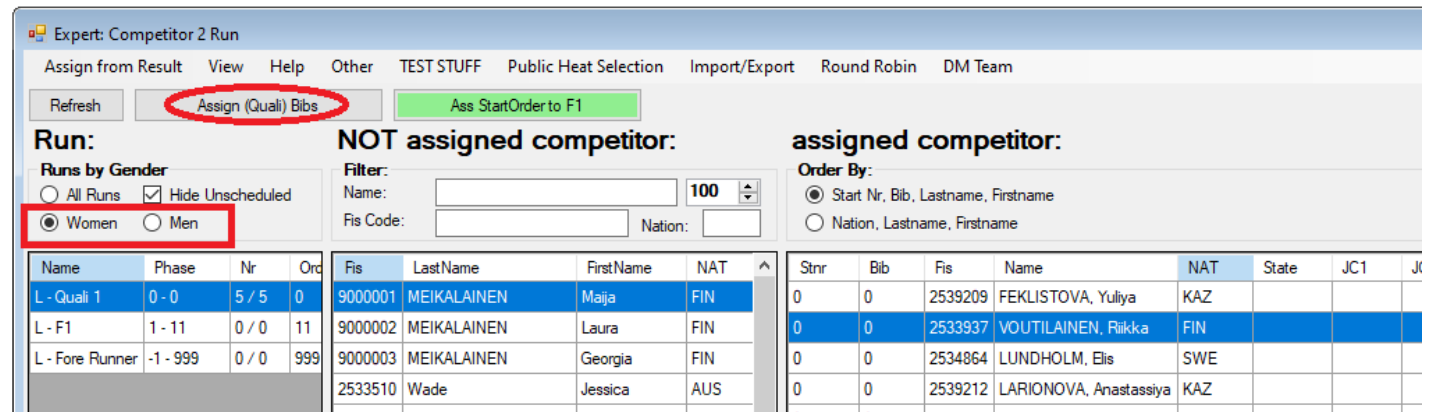

NOTE: After the import, please restart the software.

NOTE: If you cannot see the cup points on the bib assignment list, and you want to add them, please redo the cup standing import. When you redo it, choose “As (World) Cup” instead of “As additional Cup” and “Default”

To assign the bibs go to “Setup Database and Event” -> “Expert: Competitor 2 Run”

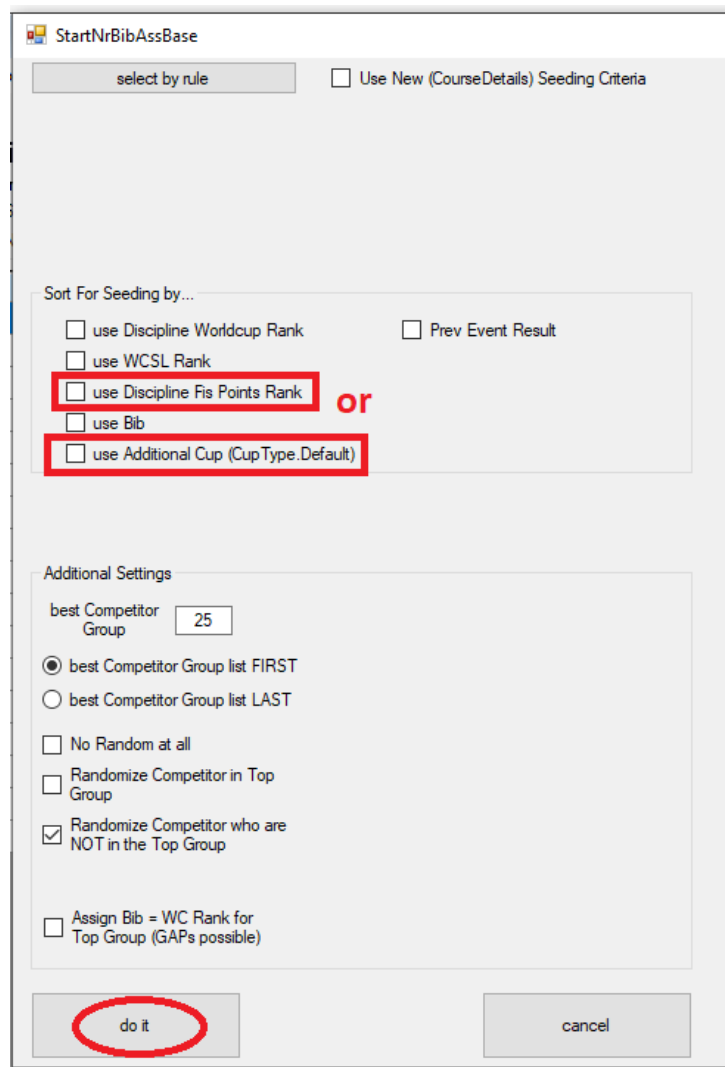

Choose gender and click “Assign (Quali) Bibs”. A new window will open

- Choose “use Discipline Fis Points Rank” or “use Additional Cup (Cup Type Default)”

- click “do it”

Assign start order in Moguls Continental Cup

In Moguls Continental Cup events start order should be assigned by Cup standings. In the first event of the season, when standings are not yet available, FIS points list should be used instead.

The top 30 competitors will be randomly drawn to the first 30 positions on the startlist, with the rest of the athletes drawn randomly to the remaining positions.

To assign the start order, follow these instructions.

NOTE: If you use the FIS point list to assign the start order, see chapter “Import FIS Athlete Data” on how to import FIS points. Complete those steps before you proceed with the draw.

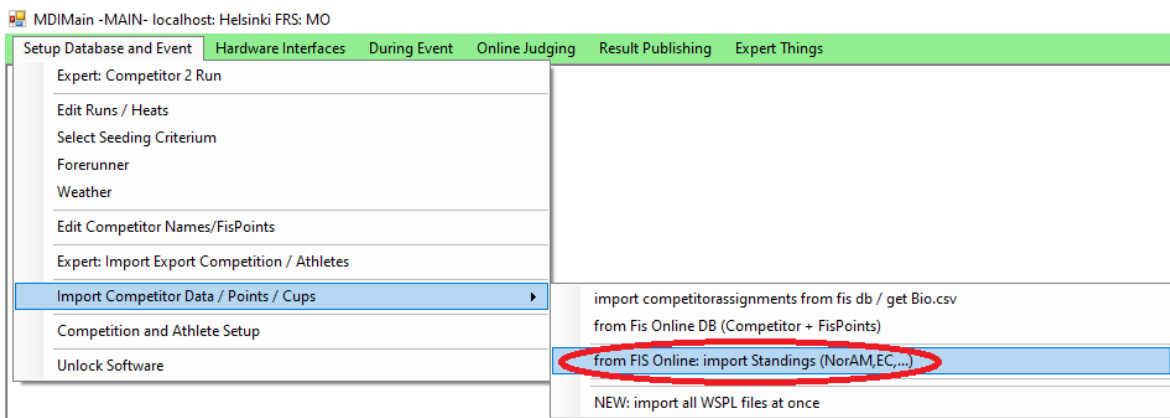

If you use cup standings, follow these instructions for cup standings import:

Go to “Setup Database and Event”

-> “Import Competitor Data / Points / Cups”

-> “from FIS Online: import Standings (NorAM, EC, ...)”

A window opens.

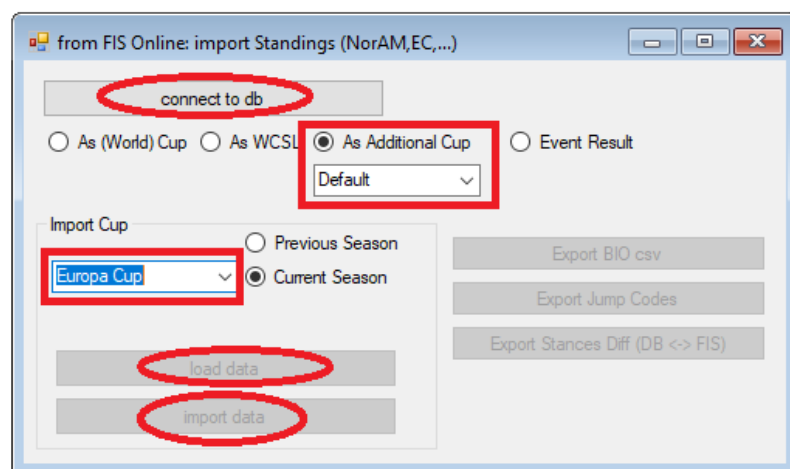

- Select “As Additional cup” and “Default”.

- Select your cup, “Europa cup” for example

- Click “connect to db”

-> “load data”

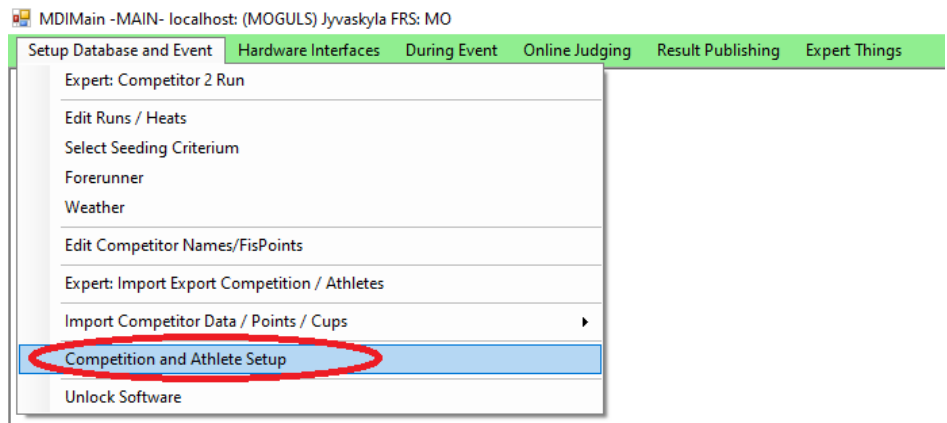

-> “import data”

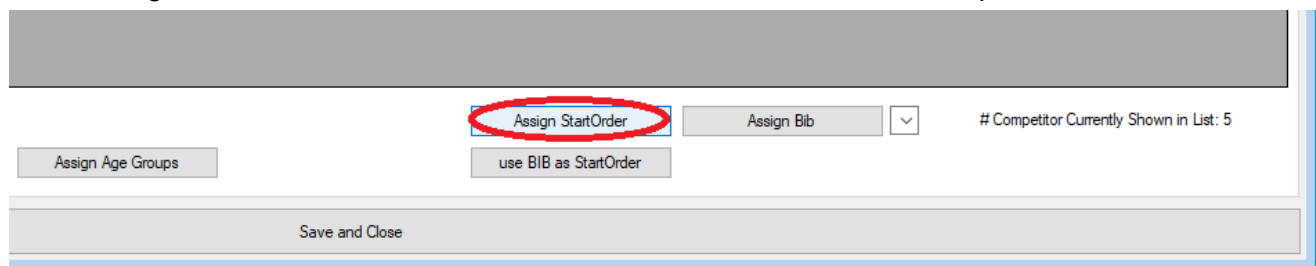

NOTE: After the import, please restart the software.

NOTE: If you cannot see the cup points on the start list, and you want to add them, please redo the cup standing import. When you redo it, choose “As (World) Cup” instead of “As additional Cup” and “Default”

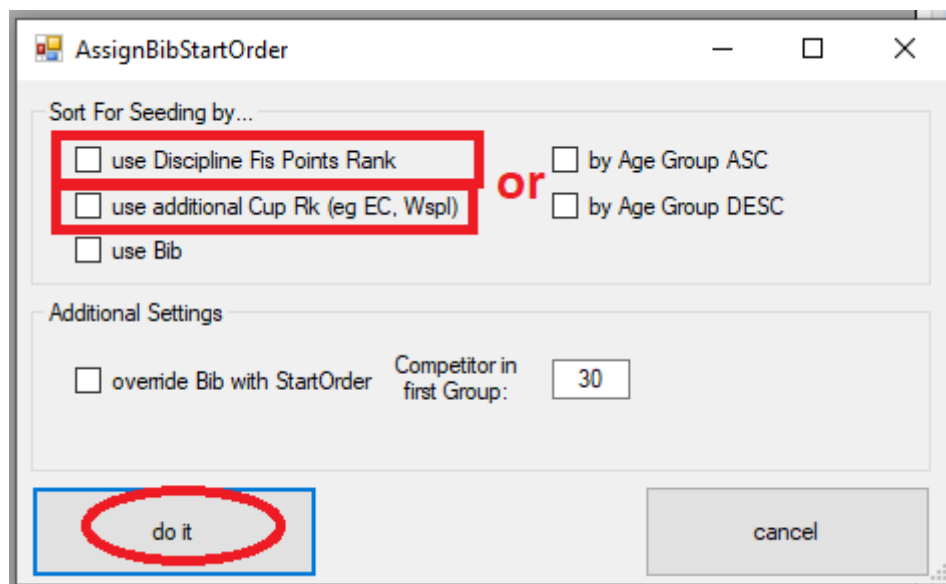

For the assignment, go to
“Setup Database and Event”
-> “Competition and
Athlete Setup”

Click “Assign StartOrder” at the bottom of the window. A new window will open.

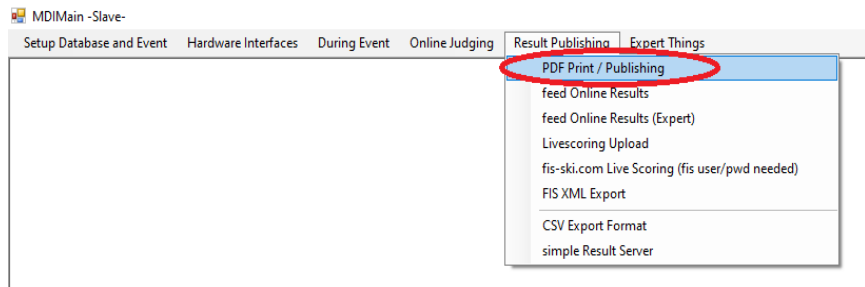

Select here “use additional Cup Rk (eg EC, Wspl)” or “use Discipline Fis Points Rank” and click “do it”.

Result Publishing

Print and generate .pdf files

Go to “Result Publishing”
-> “PDF Print/Publishing”.

By clicking on the Buttons “TCM Lists”, “Start Lists”, “Result” and “cup List” on the top left you can show and hide the respective documents on the list.

First, select the phase (Quali, Final) in the dropdown, then the gender. Click on the list you want to generate on the left.

FIS FREESTYLE SKI EUROPA CUP 2024
Start List - Qualification
Men's Moguls
TAIVALKOSKI (FIN)
SAT 10 FEB 2024 Start Time: 16:40

2	15	2530000	BELLUCCI Massimo	ITA	1999	10.62	15.97	6.5	6.7	13.6	47.5	75.34
3	27	2534403	PASCARELLA Paolo	SUI	2004	19.97	15.07	6.1	7.3	16.7	47.9	75.14

Select "Customize Report Fields" to open "ReportFieldsEditor".

In "ReportFieldsEditor" you can edit the name of the competition or cup that will appear on all pdfs.

In Europa Cup write for name "FIS FREESTYLE EUROPA CUP 20XX"

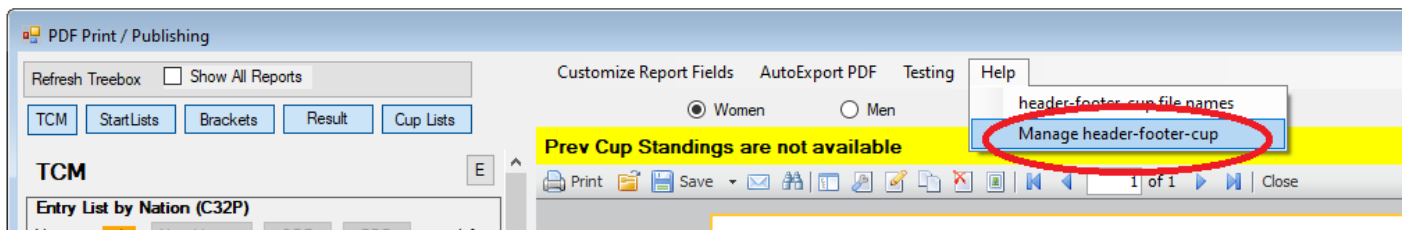

You can also select the cup code.

NOTE: If you have problems generating pdfs, choose cup code "WC".

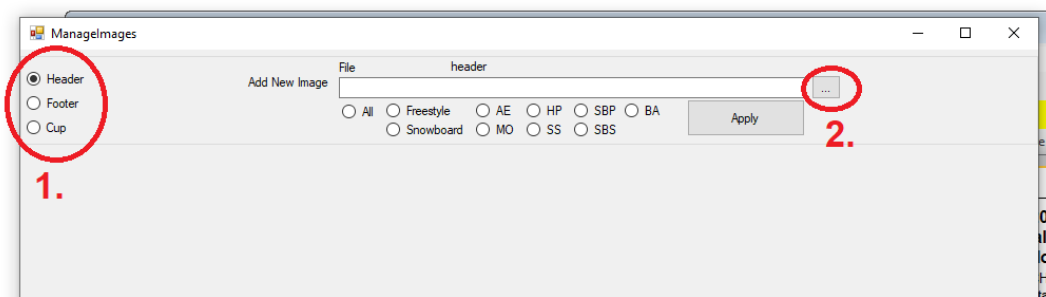

Here are the pdfs you usually need in a competition:

Add logos to pdf results

Go to "PDF Print / publishing" -> "Help" -> "Manage header-footer-cup"

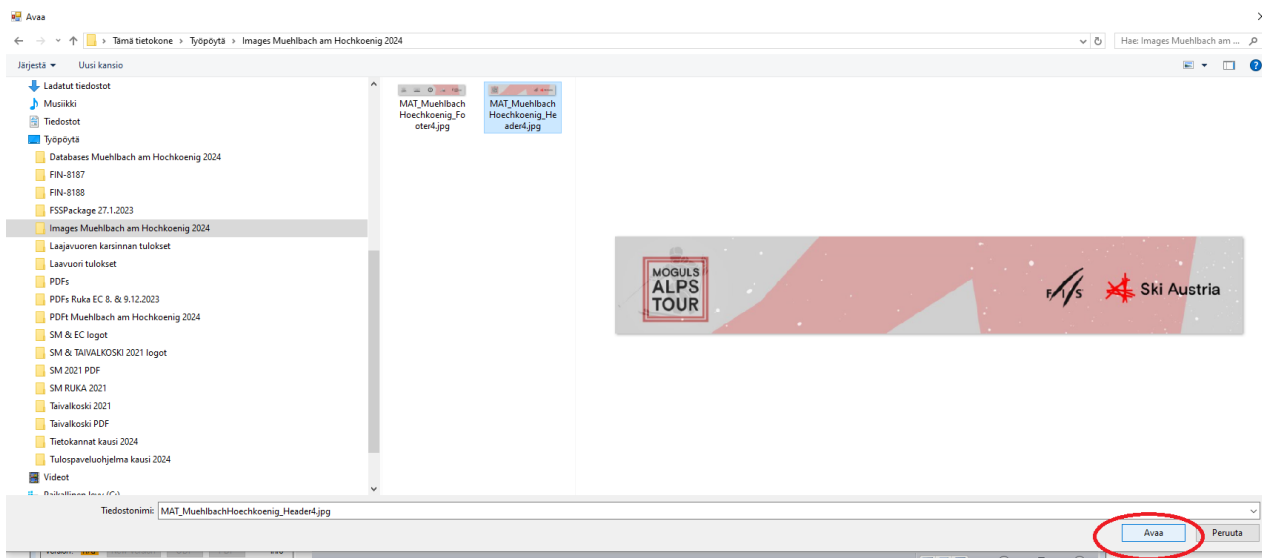

Another window will open. Select first "Header", "footer" or "Cup" (logo next to the event title), then click the 3 dots "..." on the right.

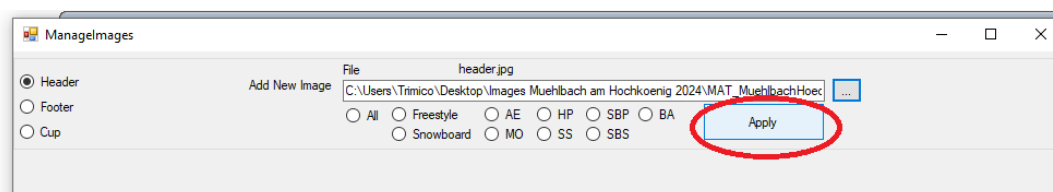

Select the picture file that you need.

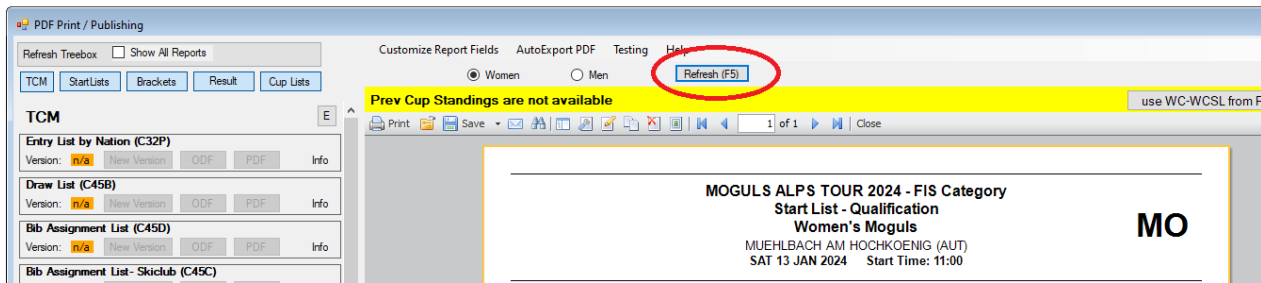

NOTE: Both header and footer must be sized 2291 x 354.

Click "Apply"

Once you click "Refresh(F5)" the graphic will show up on all documents.

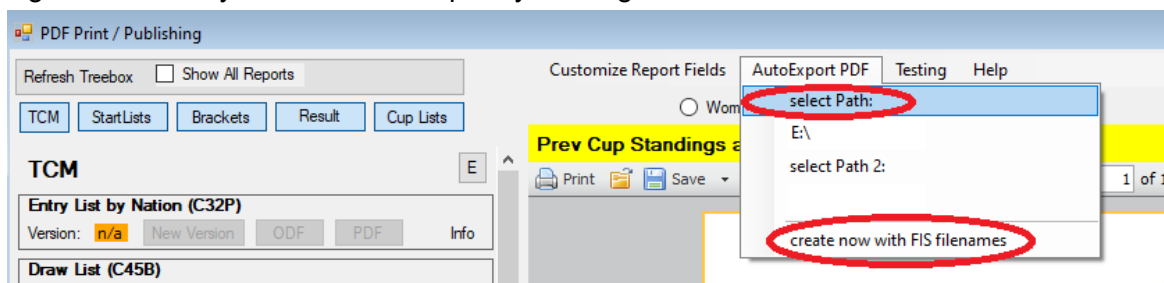

How to save a .pdf file

First you must choose the location where you want to save the pdfs on your computer. The location will be saved, so it's enough to choose it once for every competition.

To select a location, go to "AutoExport PDF" -> "select Path".

After selecting the location, you can save the pdf by clicking "create now with FIS filenames".

You can also choose "Save" or "Print" -> "print to pdf", but then you need to name the file manually.

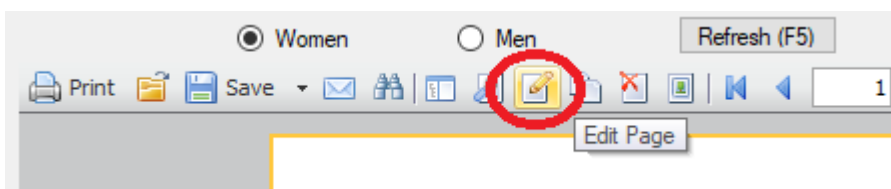

How to edit a pdf file

In some cases, you must edit the pdf files:

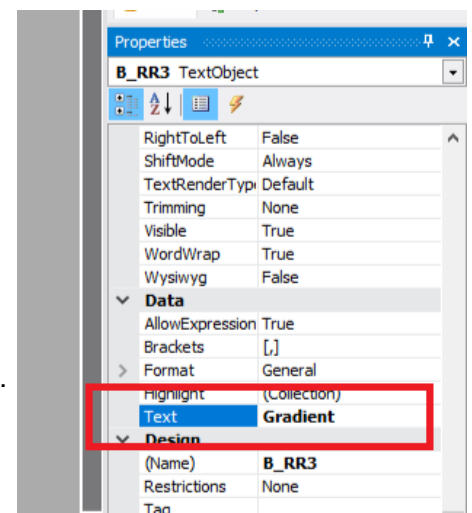

- If you import Continental Cup standings as World Cup, you will find "World Cup Points" instead of "Europa Cup Points" in some pdfs
- If the course length or gradient is missing from the result pdf
- If the descriptions of judges' assignments are not correct

To edit a pdf, choose the list you want, and click the edit icon to open the pdf editor in the program.

Once you have opened the pdf editor, select the text you want to edit or the place where you want to add text in the pdf. Then you can write in the text field that you find on the list on the right in the pdf editor.

NOTE: You must print or save the pdf immediately after editing, before selecting another list in the program. Changes cannot be saved for later.

Upload pdf documents to the FIS website

In order to upload pdfs to the FIS website you need to send them to Kathrin Hostettler FIS, who will upload the files.

- send the pdfs by email to hostettler@fis-ski.com

NOTE: Make sure the files are named correctly before you send them to Kathrin Hostettler.

The pdf files must be named according to a specific FIS format, and the program should name them correctly. If you name them manually, make sure the names are correct.

- Name example: 2026FS8389RLF.pdf
- A file name must include the following parts in this order:
season + "FS" + competition codex + type of list
- The type of list is an abbreviation: RLF = result list final, SLQ = startlist qualification, SBLF= start bracket list final etc.

What pdfs should be uploaded to the FIS website

In all FIS events, you must upload the final results (final + those who didn't qualify). This is the minimum, you can upload start lists too for example, if you want to.

In Europa cup, you must upload the following lists:

Moguls and Aerials:

- Startlist for qualification
- Results from qualification
- Startlist for final
- Final results (final + those who didn't qualify)

Dual Moguls:

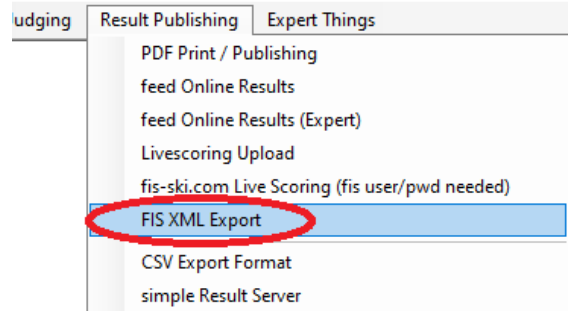

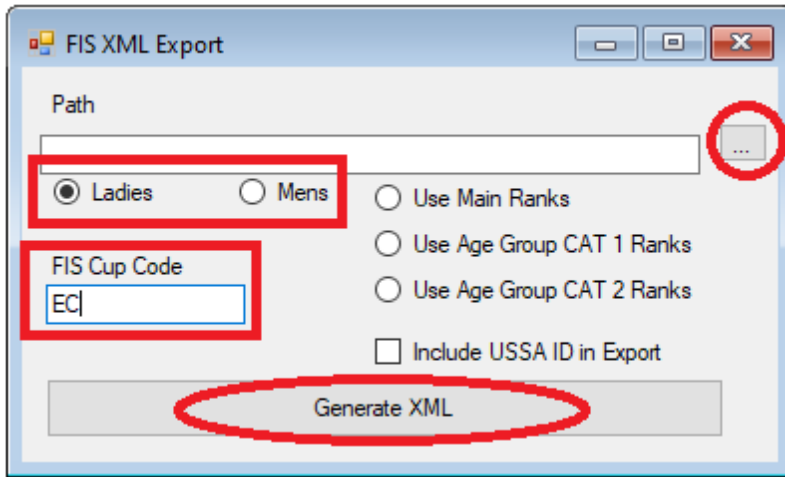

- startlist (brackets)
- final result list
- final result brackets

In other Continental Cups

- consult your Race Director

.xml export

Go to “Result Publishing” -> “FIS XML Export”.
The following window will open:

- by clicking the 3 dots "..." you can choose the location on your computer where you export the xml files.
- choose the gender
- write in correct cup code, for example EC, FIS, NAC etc.
- click “Generate XML” to create the file for selected gender

In order to upload xml files to the FIS website:

- send an email to **results@fis-ski.com**
- attach the file you want to upload
- You can attach one xml file per email

Judges' Tablets

Judges' tablets are Windows tablets where judges, who are on site, can enter their scores. Tablets can also be set up for the Head Judge to review the scores, and for the announcer to follow the results. Instead of tablets, also computers can be used for this purpose. Tablets must have the GSS software package installed on them.

In Europa Cup the FIS Race Director will provide you with the tablets.

In order to connect the tablets, you need to set a fixed IP address on your scoring laptop. Follow these instructions on Windows 10:

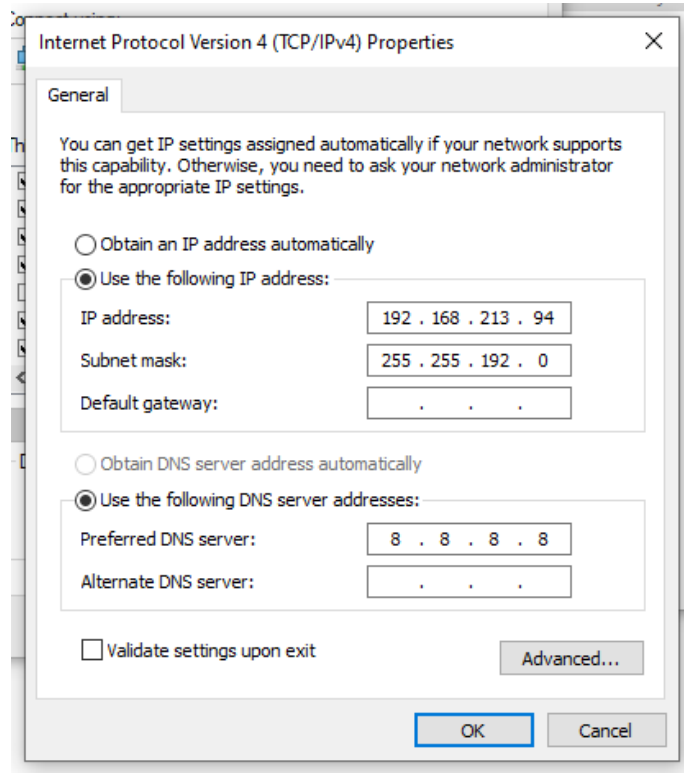

Go to Control panel
-> Network and Internet
-> Network and Sharing Center
-> Change adapter settings
-> Ethernet
-> Properties
-> Internet Protocol Version 4 (TCP/IPv4)
-> Properties

Set a fixed IP address as shown in the screenshot.

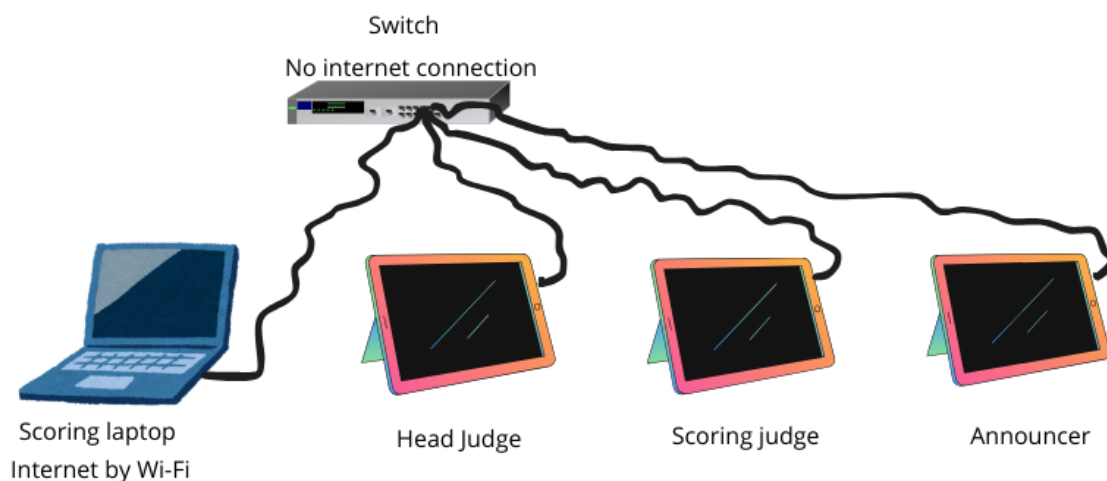

NOTE: The tablets must also have a fixed IP address, as any other devices in the same setup.

All the IP addresses must be within a certain range:

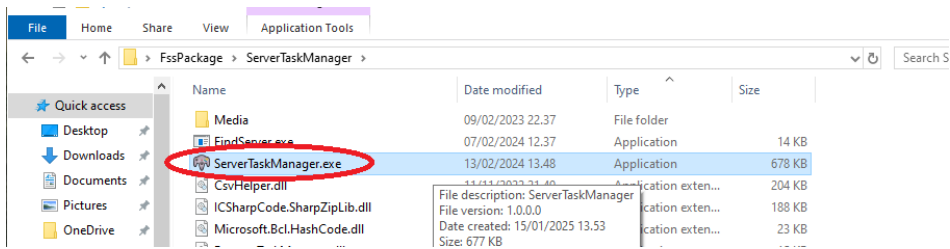

- subnet: 255.255.192.0
- IP addresses: 192.168.213.XX
- for the last two numbers of the IP addresses, use numbers from 94 to 99
- don't use the same IP address for two devices

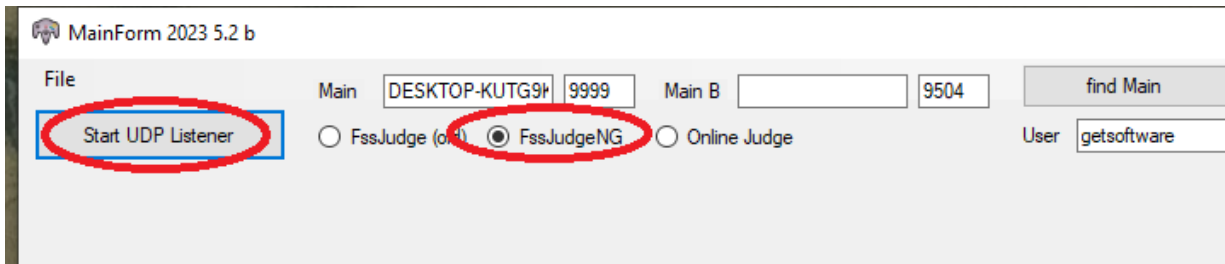

Tablets are connected to the scoring laptop by network cable and via a switch. Do not connect the switch to the internet. The scoring laptop must get internet via Wi-Fi.

To start the tablets, first make sure that ClientTaskManager is running on them (and started as admin). Then start ServerTaskManager on the scoring laptop.

Choose “FssJudgeNG” and click “Start UDP Listener”.

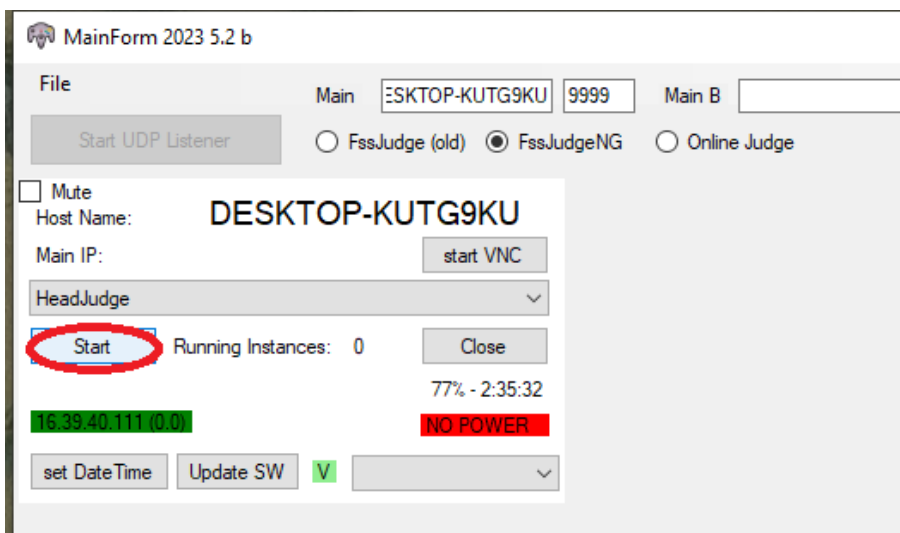

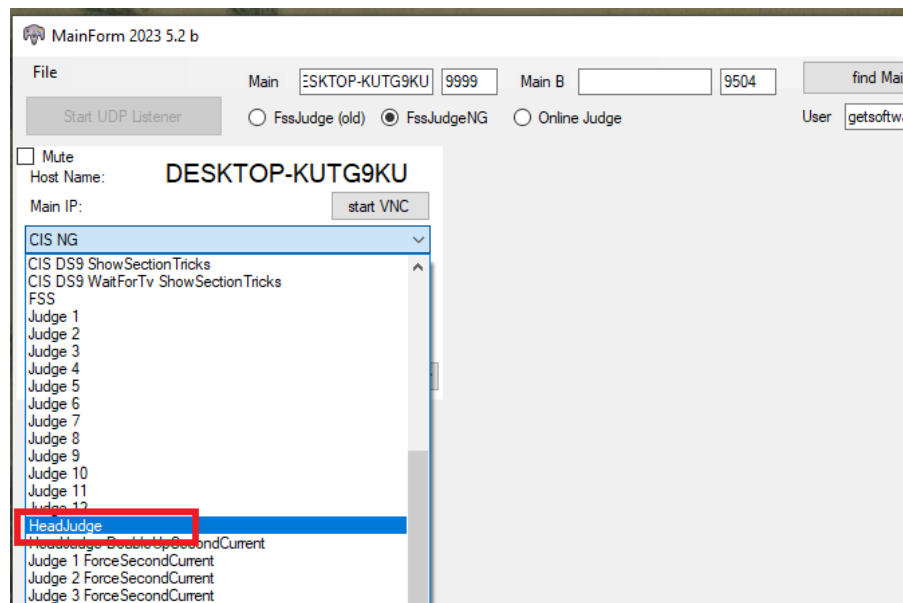

You will then see all the tablets that are connected. You need to choose whom each tablet is for.

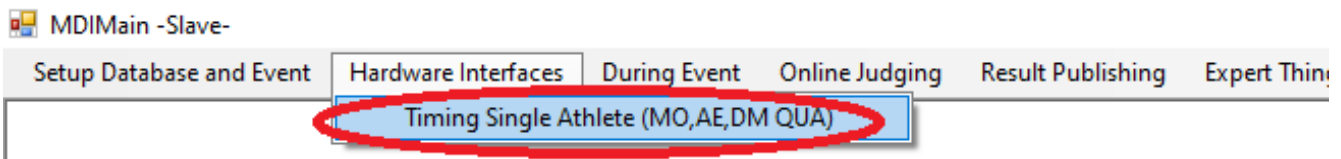

The options you need:

- Judge 1, 2, 3 etc. for scoring judges
- “HeadJudge” for the Head Judge
- “CIS NG” for the announcer

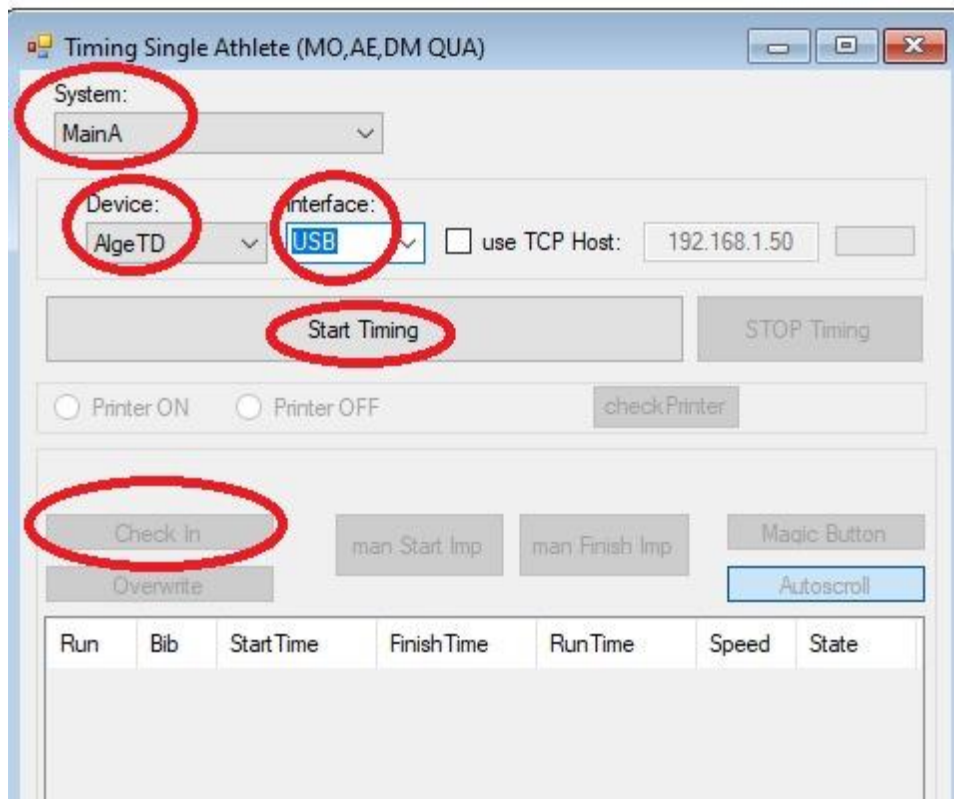

Choose what you need to, and click “Start”, which will start the software on a tablet.

Timing in Single Moguls

Go to "Hardware Interfaces" -> "Timing Single Athlete".
Another window will open where you can select the "Device" and "Interface".

Then click "Start Timing" and you should see the runtime entering automatically in the "Current Run and Scoring – Advanced user" window.

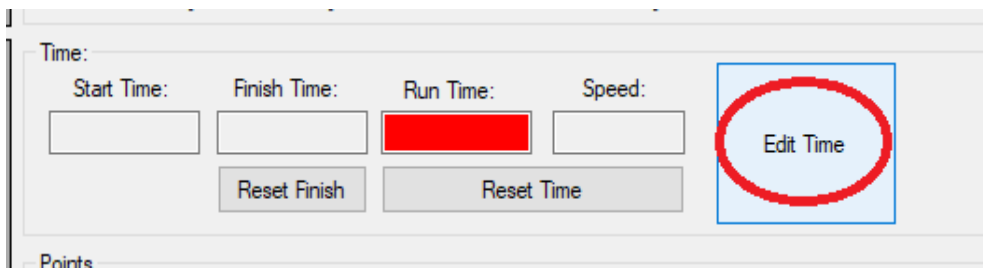

"Check In" blocks the timing impulses; you can use it during breaks in the competition

NOTE: If you have problems with Alge Timing, please update Timy driver software on the scoring laptop as a first step.

NOTE: If the timing hardware you are using is not compatible with the software (for example Microgate) you must enter the times manually.

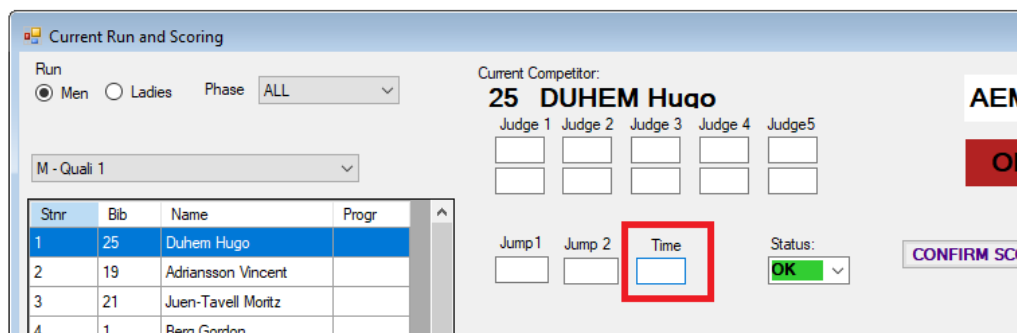

If you have online judges or use the tablets enter the times as follows:

- Go to “During Event ->” "Current Run and Scoring – Advanced User needed for OnlineJudging" -> “Edit Time”
- Enter the times in the field “Run Time”

If you have only on-site judges and you don't use the tablets, do as follows:

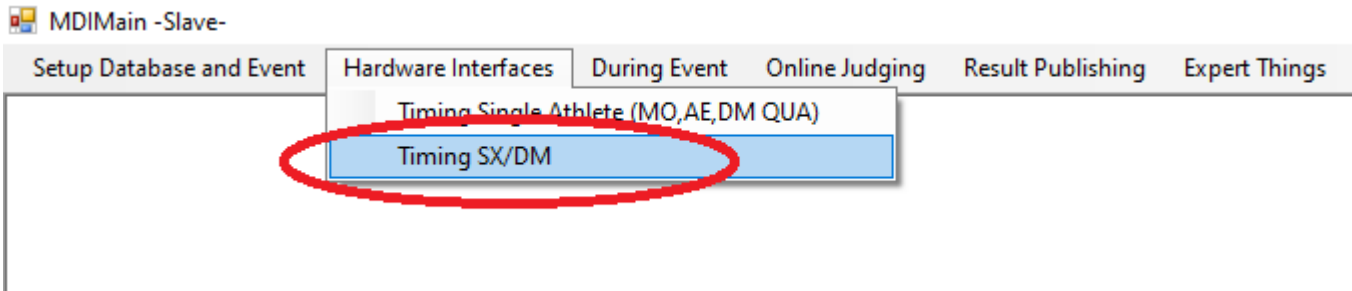

- You can enter the times in the window where you enter all the scores
- Go to “During Event” -> "Current Run and Scoring"
- There's a field for time

Stnr	Bib	Name	Progr
1	25	Duhem Hugo	
2	19	Adriansson Vincent	
3	21	Juen-Tavell Moritz	
4	1	Bera Gordon	

Timing in Dual Moguls

To set up the timing in dual moguls, go to “Hardware Interfaces” -> “Timing SX/DM”

Here you can choose the hardware e. g. “Alge TD”.

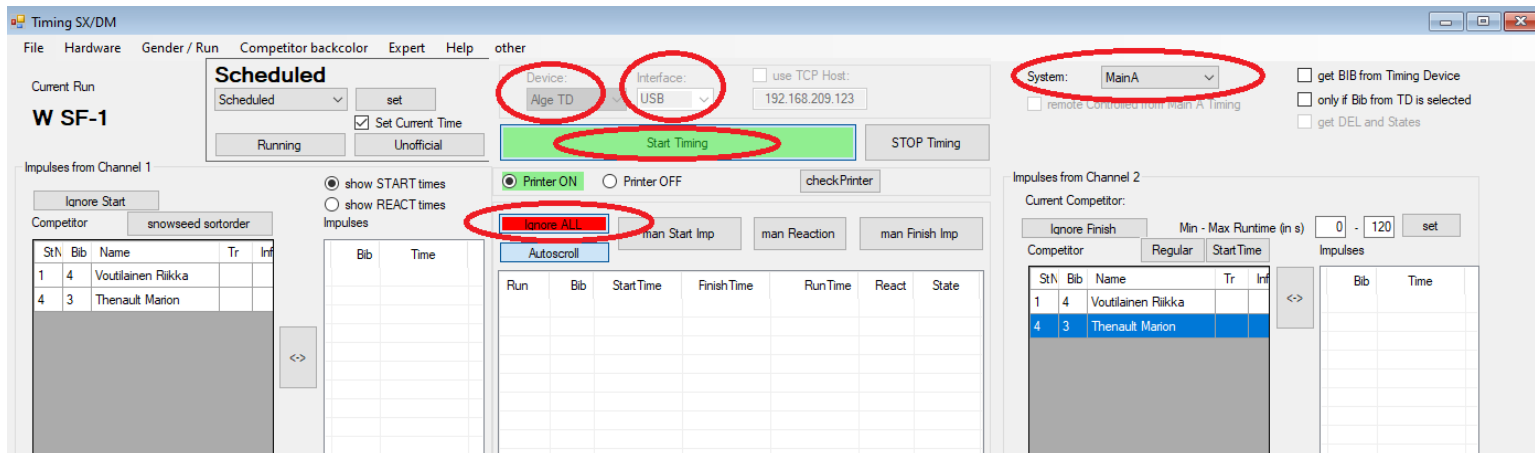

If you are connected to the timing device via USB, write “USB” in the field named “Interface”.

You can also choose COM3, for example, if that’s how your timing device is connected to the computer.

Choose “MainA” in the field named “System”

To start the timing click “Start Timing”

NOTE: If the “Ignore All” button is red, you must click it. Otherwise, the times will not appear in the scoring window.

NOTE: If your timing device is not compatible with the software, e.g. Microgate, the speed judge must calculate the timing scores. If you’re connected to the judges’ tablets, the speed judge can enter the scores on his/her tablet.

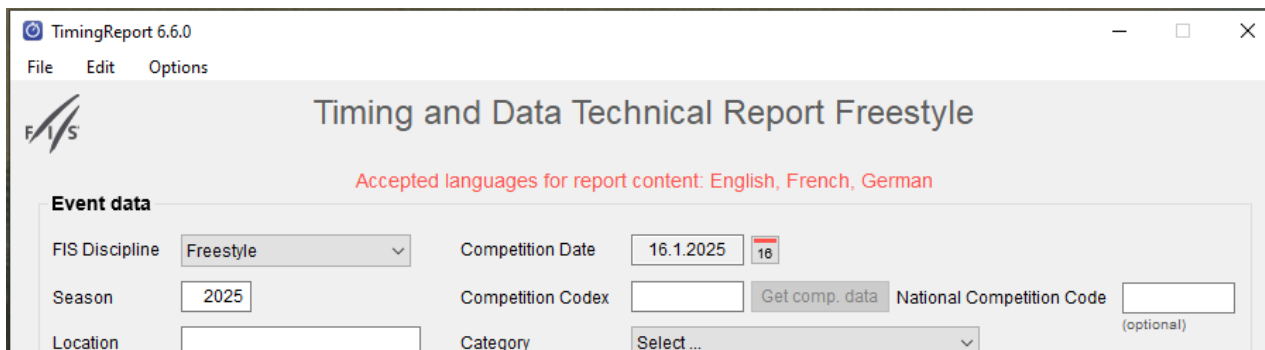

Timing Report

From every Moguls and Dual Moguls event a timing report must be prepared and sent to FIS. The timing report is usually prepared by the Chief of Timing of the event. You must do a separate timing report for each gender.

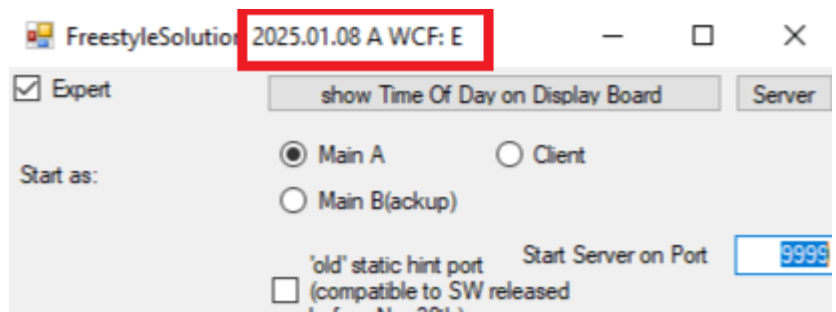

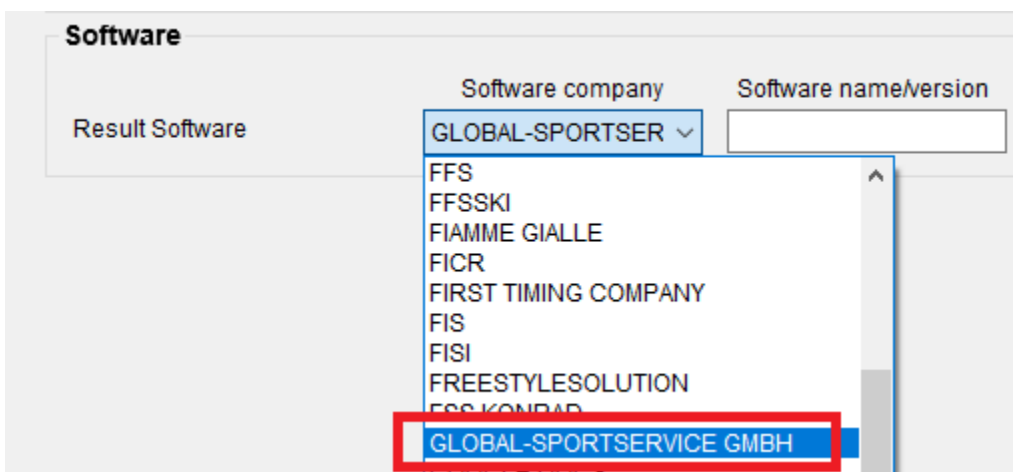

In order to create the report, download the Timing Report software from the FIS website and install it on your computer:

<https://www.fis-ski.com/inside-fis/general-fis-documents/timing-data#Timing%20Report>

The program lets you create the report, as an xml file, which you must send to FIS by email.

When you enter the name of the results software company choose "Global-Sportservice GmbH". For the software name, write "Fss Light". You can find the software version in the first window, when you open the scoring software.

Finally, you must send the timing report to FIS.

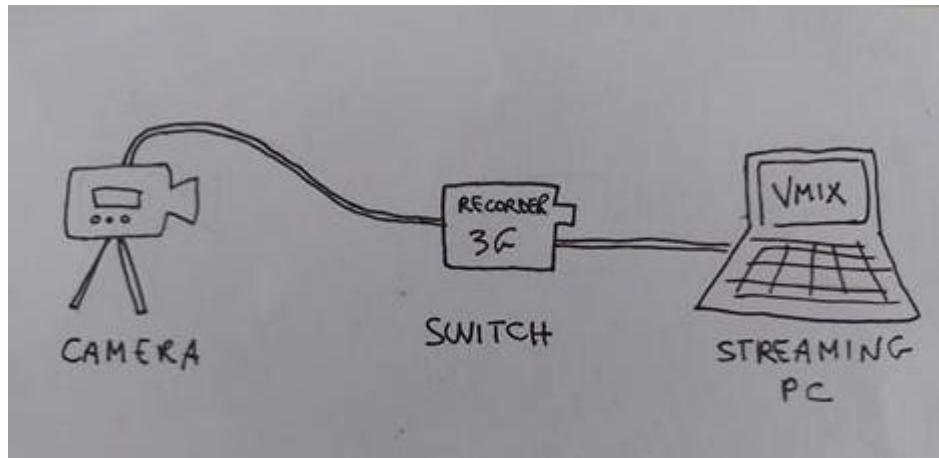

- send an email to **results@fis-ski.com**
- write as subject *nation + competition codex*, for example: FRA1234
- attach the xml

NOTE: For more detailed instructions, see the Timing Report User Manual on the FIS website:
<https://www.fis-ski.com/inside-fis/general-fis-documents/timing-data#Timing%20Report>

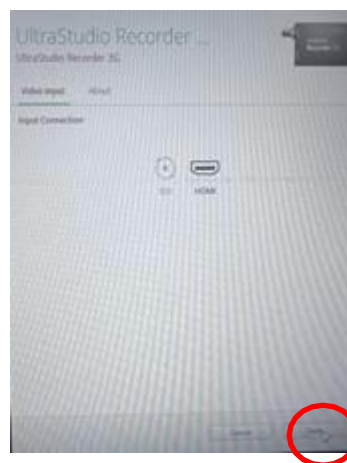

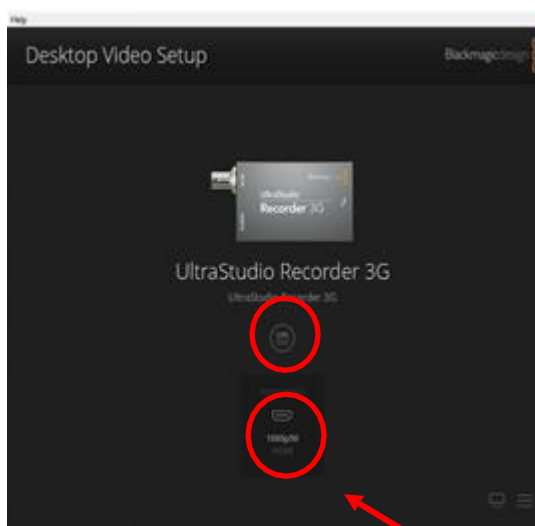

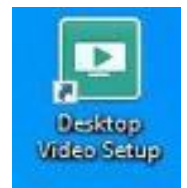

Vmix

VMix is the streaming program for online judging.

Connect the “UltraStudio Recorder 3G” to the camera and the streaming computer.
Then turn on the camera.

Open “Desktop Video Setup” and choose the connection of the video cable to the UltraStudio Recorder 3G (HDMI/SDI), then click “save”, the white light on the Blackmagic should be on.

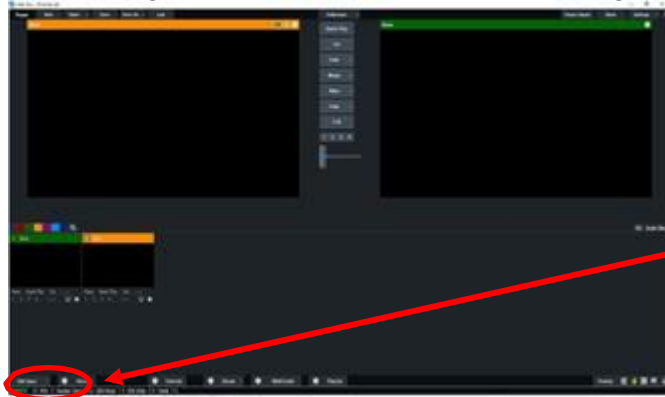

check the resolution

When you open Vmix this window will open.

Click on “new”: all the settings are going to be saved, click on “last”: you get the last saved setting.

After setting the Video Input open the Vmix program: This window will open.

Click on “Add Input” (bottom left)
→ next window will open.

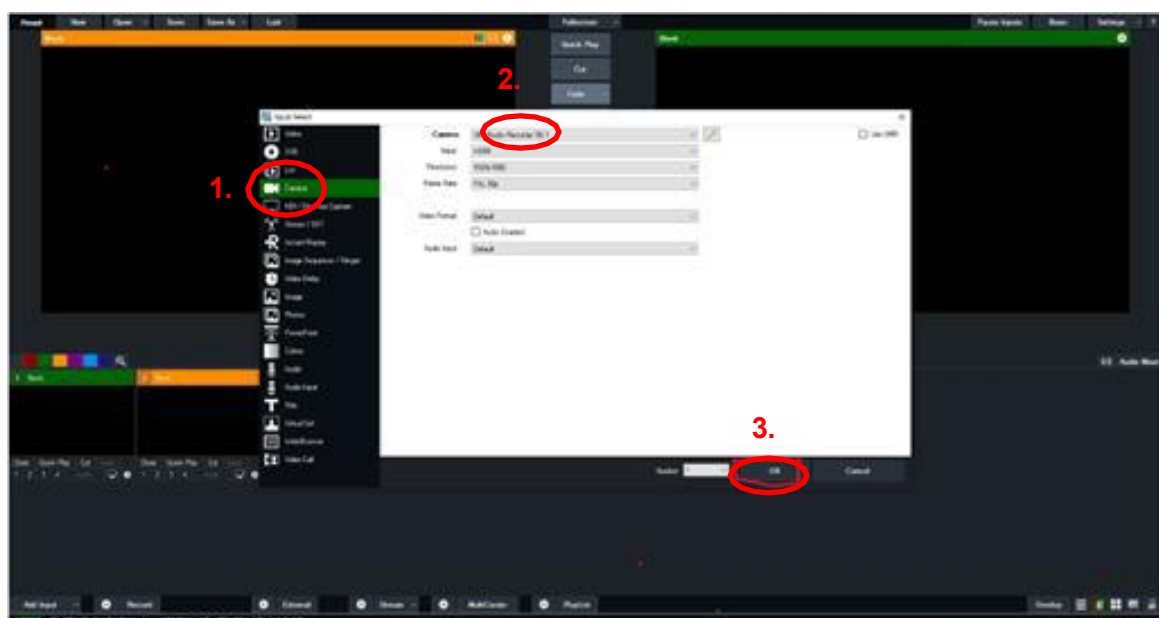

→ click on "Camera"

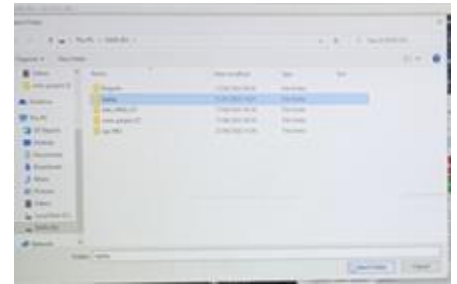

→ Choose “UltraStudioRecorder 3G”

→ Click “ok”

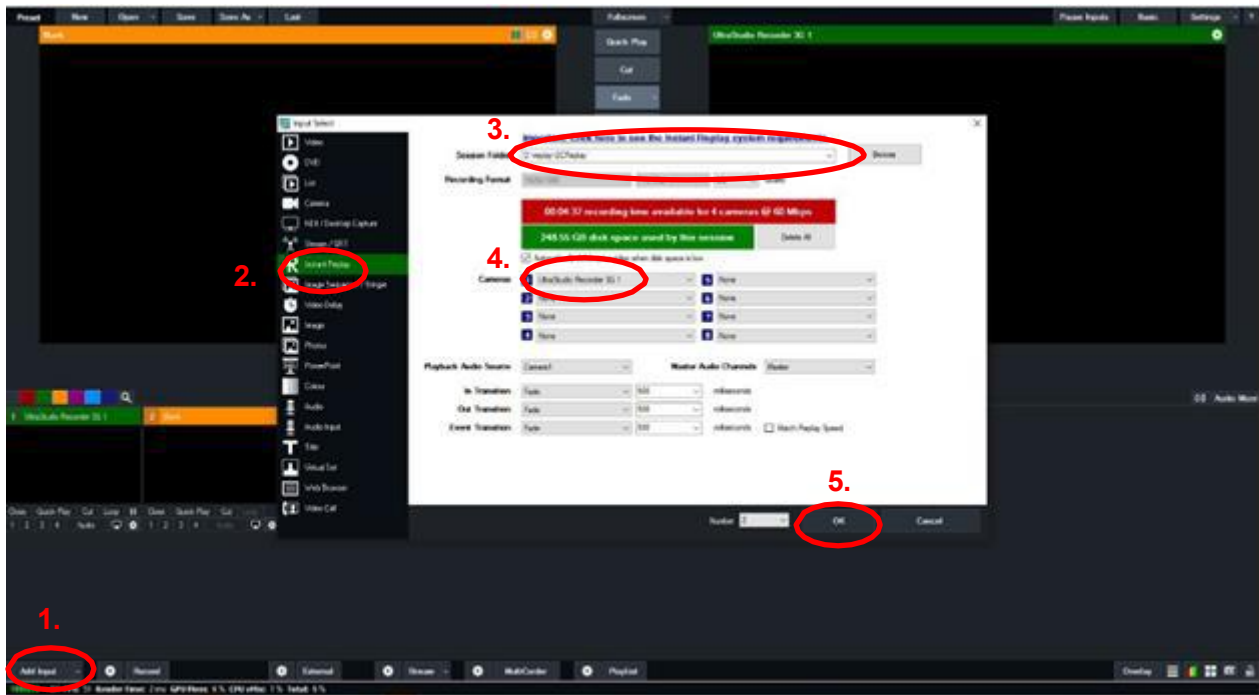

Resolution and Frame rate has to be the same!

- Click “Add Input”
- Click “Instant Replay”
- Choose the correct folder for the Videos (create a new folder for every competition)
- Make sure the right camera is inserted
- Click “ok”

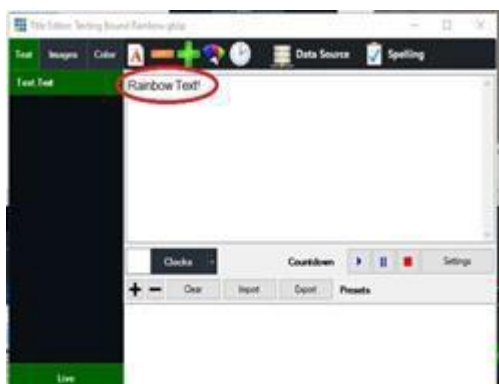

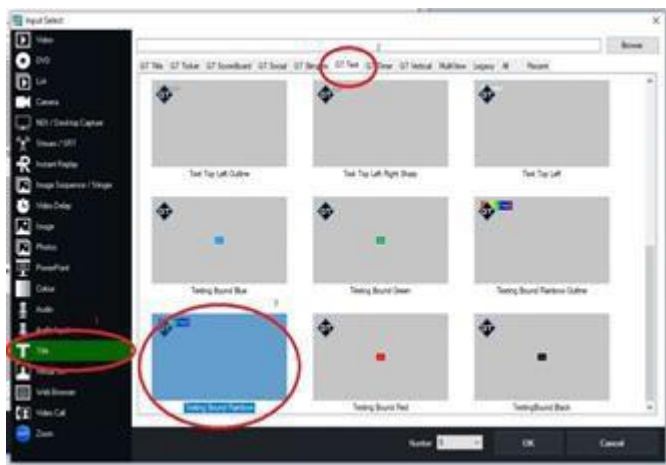

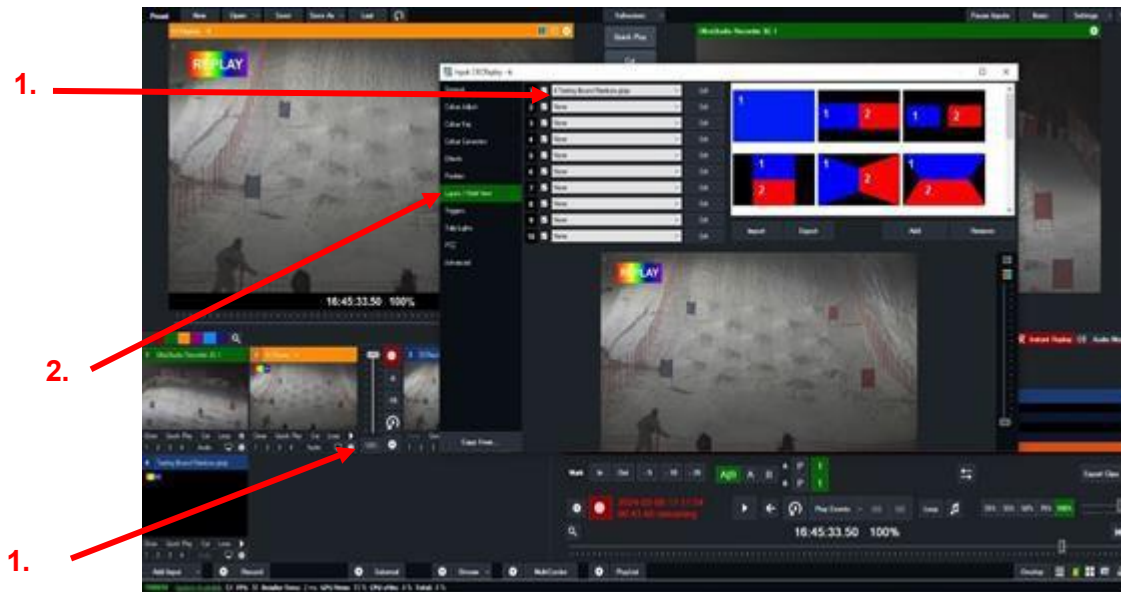

Control that the settings for resolution and frame rate are the same here as above.

Replay:

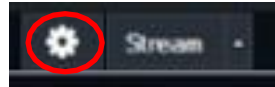

- click on the “wheel”
- click on “Layers”
- choose: “Texting Bound Rainbow gtzip”
- close this window

Change “Rainbow text” to “REPLAY” and press “ok”

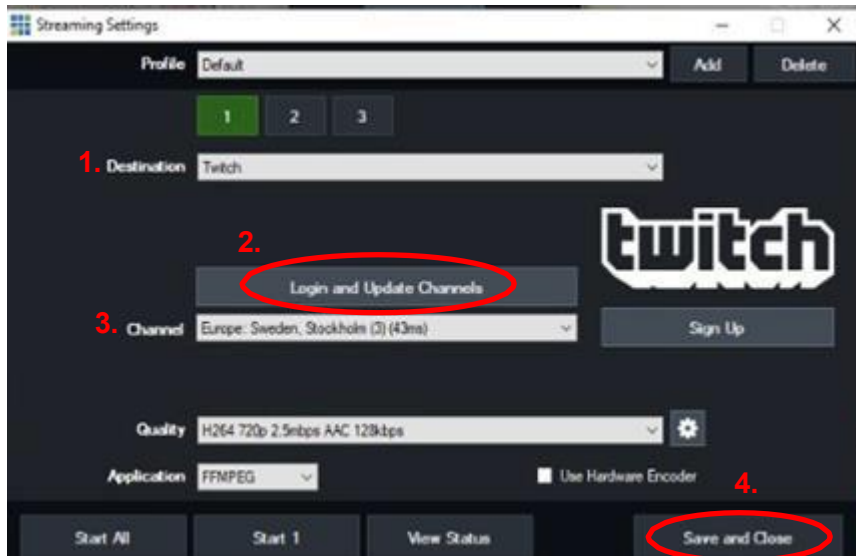

Twitch

Then click on “Stream” setting.

Another window will open:

- choose the streaming destination: Twitch
- click on “Login and Update Channels”
- Wait until you see a channel
- click “Save and Close”

once you are connected with “twitch” click on “Stream” and wait until it turns red (see the picture in the next page).

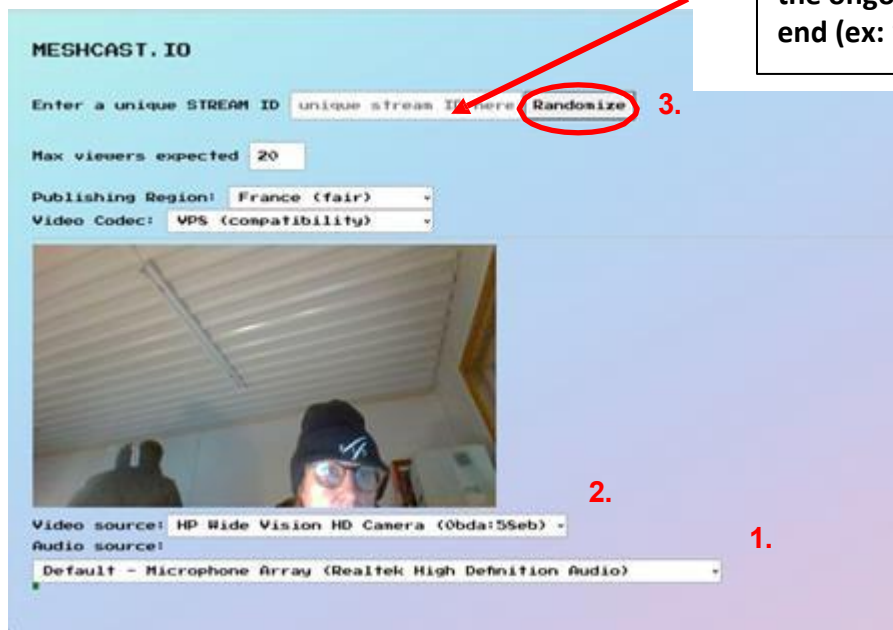

MESHCAST.IO: Backup streaming

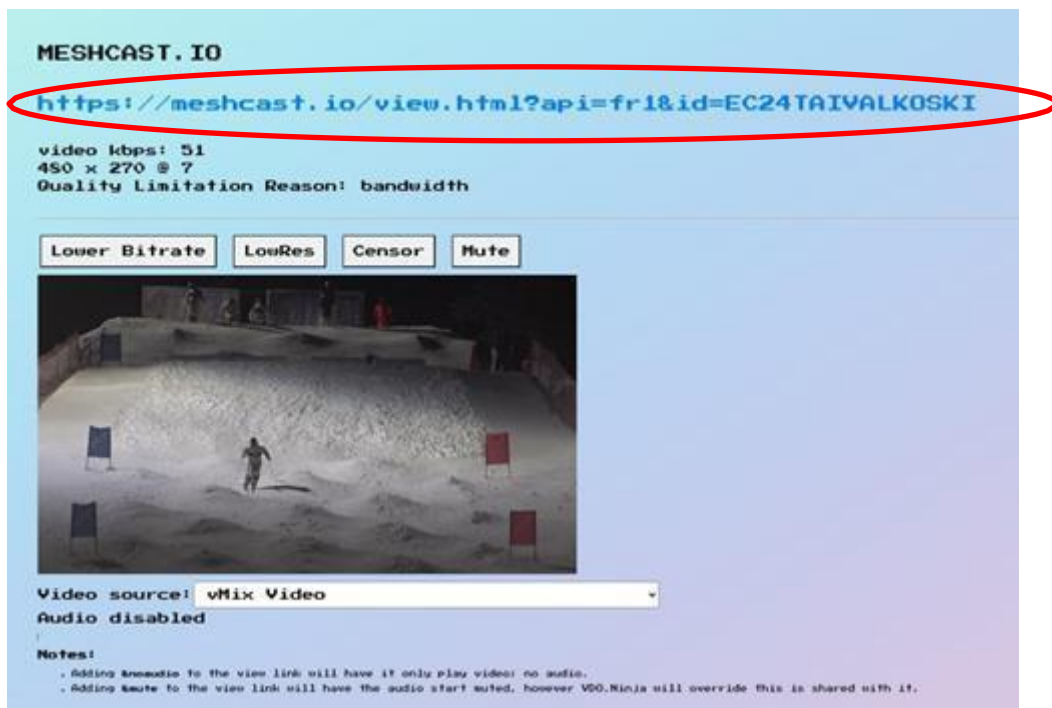

Go to your browser and search “meshcast.io”. This window open:

- click on “no audio”
- click on “ViMix” Video
- click on “Randomize”--> see the next picture, that shows the link

Always use the same link with the ongoing events name at the end (ex: “ecairolo”).

This link has to be inserted in the GSS Data Programm when you are setting the Online Judging (view page n°12), it is needed as a backup streaming if Twitch does not work.

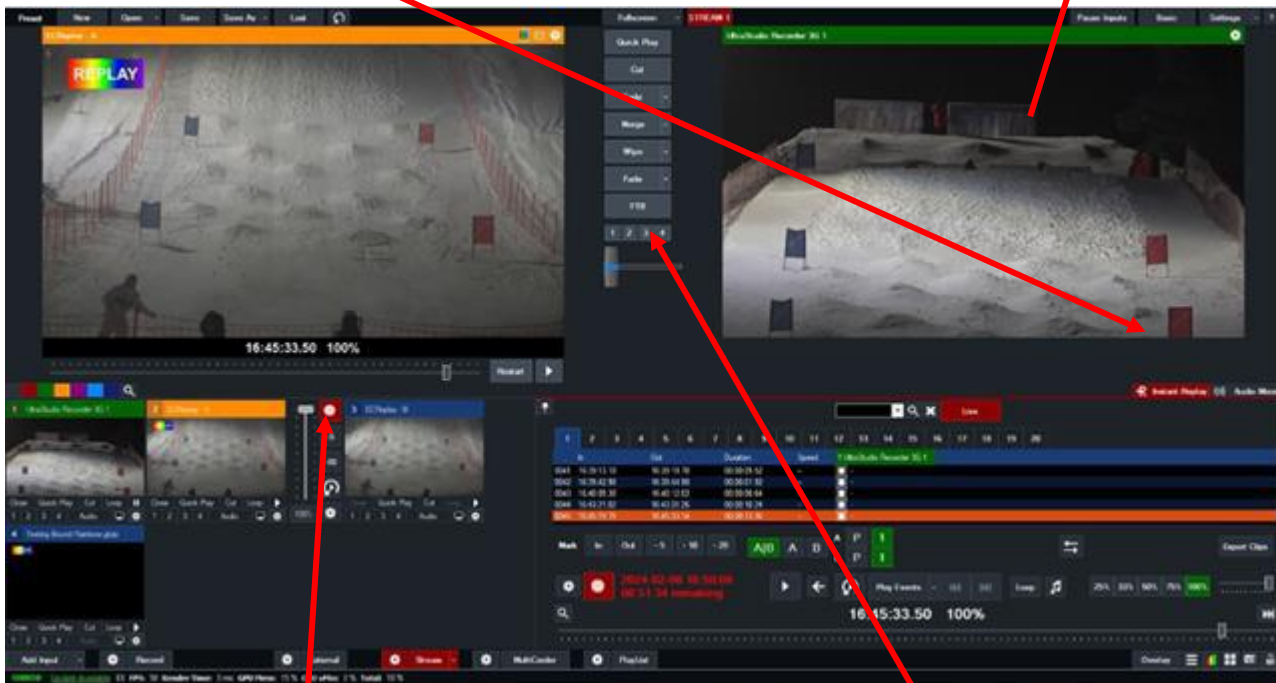

Keep open this window to make sure Meshcast is running.

Replay recording

this picture shows the streaming

Turn on the camera and you should see this screen with the live event you are filming.

Click on “instant replay”

Click on this sign to be ready to stream

With this bottom you change the two pictures. Judges see what is on the right side. To show the replay change the “screens”

During competition

For replay: push “in” when the athlete starts their run and “out” when they cross the finish line.

To show the replay to the judges what do you press? So, you can see the last run.

how to slow down? MO 100% and AE 50%.

If you need to see older runs you need to choose the right clip and click here and manually change the two sliders so the judges can see the replay.
