1. FIS Alpine Timing Guide

Please note references to race Level classifications as listed here:

Category	Description	Level
OWG	Olympic Winter Games	0
WSC	FIS World Ski Championships	0
WC	FIS World Cup	0
WQUA	World Cup Qualification	0
COM	World Cup Speed Event	0
ANC	Australian New Zealand Cup	1
EC	European Cup	1
ECOM	European Cup Speed Event	1
EQUA	European Cup Qualification	1
FEC	Far East Cup	1
NAC	Nor-Am Cup	1
SAC	South American Cup	1
UVS	Universiade	1
WJC	FIS Junior World Ski Championships	1
YOG	Youth Olympic Winter Games	1
NC	National Championships	2
AWG	Asian Winter Games	3
CISM	Military and Police	3
CIT	CIT Race	3
CITWC	CIT Race Arnold Lunn World Cup	3
FIS	FIS Race	3
FQUA	FIS Qualification	3
JUN	Junior Race	3
NJC	National Junior Championships	3
NJR	National Junior Race	3
UNI	University Race	3
EYOF	European Youth Olympic Festival	3
PARA	PARA events	3
ENL	Entry League FIS races	4

Software and setup of a higher category can also be used.

Example: Level 2 can use same software and setup as Level 1 or 0.

2. Introduction

The purpose of the Data book is to aid software developers who have interest to provide software for FIS disciplined Sports. This book is not intended to be a specification for writing software but only a guide to establish the elements needed to produce the proper information, reports and electronic files for scoring Alpine FIS Races.

The Data book will also serve as a resource to organizers for the production of pre and post competition information, sending electronic result files and verification of valid races (valid for points).

Templates, sample competition lists and XML descriptions can be found in the Appendix.

3. Result software

Data software must be written to follow the FIS rules and include elements defined by the FIS for the production of competition lists and results. The software must also have the ability to produce xml messages for sending electronic results to the FIS result server and for FIS live timing (optional). Providers interested to produce software for FIS competitions should contact the FIS IT department and arrange a test of the xml electronic file for validation. There is no direct certification by the FIS for software at this time.

4. User support

Software editor should provide a user support (technical manual or hotline).

The FIS will not give any software assistance.

4.1. Updates

Software Providers must publish software updates in order to meet changes in rules or FIS constant values.

5. Set up of the computer processing system in the cabin

5.1. Installation

Care should be taken when using computers in an outdoor environment. Operating conditions must be respected in terms of humidity and temperature especially if the computer is left overnight inside a cabin.

5.2. Power

The use of power generators is not recommended. Back up UPS's are recommended in case of power failure. It is important that the installation is performed in the state of the art with a properly grounded earth current and overcurrent connectors for a standard differential protection.

5.3. Radio Communication Devices

The proximity of computers and RF emitting devices must be controlled so no interference can occur for example: walkie-talkie, HF radio transmission ...

6. Language

For FIS Races levels 2, 3 and 4, all lists produced should have information available in English in addition to the language of the country. The ability to produce data lists in English must be an option in the software. For FIS race levels 0, 1 all lists must be produced in English.

7. Interface with timing devices

7.1. Data

The software must be able to record 'Time of Day' or net times in the correct precision from a FIS homologated timing device. For a current list of Homologated Timing look on the FIS website (www.fis-ski.com) under "Alpine" Timing & Data section.

7.2. Bi-Directional timing communication of result data

The transfer of data from the result software back to the homologated timing (device) tape is strictly prohibited. The original timing tape from the timing device must remain protected from any external downstream system data as the original timing tape is the only official record of the core timing data in as it occurs in sequential order.

Result verification (Results = Tapes) as defined in the Rules. See Alpine ICR 611.3.3.

7.3. Timing Precision

FIS competitions time of day times must be immediately and automatically sequentially recorded on printed strips to at least 1/1000th (0.001) of second. Each competitor's net time must be truncated to 1/100th (0.01) of a second.

Computer software calculating net times must use the precision of the "Timing of Day" used in the timing device. See ICR 611.3.5

For more details, see the Timing Booklet on the FIS website under Alpine/Timing & Data. Computer Links Level 0 and 1 must be wired. Recommend also for any other level a wired connection.

7.4. Connections

The distances between computers are limited according to the type of connection:

Please read and respect the manufacture's specification.

7.5. Result computer <A> and

The result computer <A> and must operate completely independent of each other. The computer used to calculate and transmit live results must be connected to "Primary" or "A" timing device.

7.6. Online / Offline

The software should be able to read the data online (real time) or offline (after the race) from the homologated timing device.

8. Timing

8.1. Time of day

If the timers send Time of Day times, the precision must be equal to the precision of the timing device. The calculated net time corresponds to the difference between the finish time and start time of a competitor (ICR art. 611.2.1).

8.2. Net time

If the timer sends net times, the software must be not making any correction or calculation on this time.

8.3. Modifying Times

If a time from hand timing must be used in order to obtain the Net Time of a competitor, the calculation of the correction must be applied in accordance with (ICR art. 611.3.2.1).

If a time must be manually entered in the software, this must have to be noted or flagged in an obvious way within the timing log.

9. Auto-save

The software shall generate an “auto-save” cycle (maximum every ten seconds) in order to ensure backup in case of unwanted reboot or shut-down of the computer.

10. Timing and data technical report

The Timing and Data Technical Report (TDTR) is required to be sent by xml to the FIS following a race. The software developer has the option to produce the XML file out of the software or it can be used the FIS Timing Report software available. The XML description and the software are available on the FIS website (www.fis-ski.com) under “Alpine” Timing & Data section.

11. Recording the race parameters

For each race, it must be possible to input and record all required race data elements defined in each discipline XML. The current xml description for Alpine can be found on the FIS website (www.fis-ski.com) under “Alpine” Timing & Data section

The software must be able to record results for each athlete/competitor for all disciplines in Alpine Skiing and at a minimum for those counting for FIS points.

Counting for FIS points:

- DH: Downhill,
- SL: Slalom,
- GS: Giant Slalom
- SG: Super-G
- AC: Alpine Combined

Other events:

- TC: Team Combined
- TP: Team Parallel
- PAR: Parallel
- KO: KO Slalom

11.1. Race Characteristics

FIS constant values are values used to calculate results. To find the formula

Penalty result calculation, see Rules of the FIS points art. 4

All values (F-Factor, Adder, minimum penalty, maximum points) are integrated in the current FIS point list file available on the FIS website (www.fis-ski.com) under “Alpine” FIS points section (1st page PDF file or in the ZIP file).

12. Competitors

12.1. Entries

Entries are sent to the organizer with information required for each competitor :(FIS code #, Name, First Name, National ski association (NSA), Year of Birth and Category). The entry list must be used to select the corresponding competitor in the software for entry into the competition. See Alpine Skiing ICR art. 215.3.1

12.2. FIS lists

The software must be able to download or load exclusively the most Official recent FIS Points List. The lists are available on the FIS website (www.fis-ski.com) under "Alpine" FIS points section.

For better understanding of what follows the writing conventions is as below for the example of season 2013/2014 : ALFP214F.zip

- AL" [2 letters] = FIS discipline code (sector code)
- "FP" [2 letters] = Fix letters and is the abbreviation of FIS Points
- "2" [1-2 digits] = List number in the season
- "14" [2 digits] = Current season e.g.: season 2013/2014 = 14
- "F" [1 letter] = 2 possible values:
 - "F" = Full with athletes results in the season
 - "P" = Partial without athlete results

12.3. Points range

Athletes who have 9999.99 points have no FIS points. No FIS points is not the same as 0 points. The Software have to support values with a minimum of 4 digits and 2 decimals.

12.4. Points validity check

Software must warn the user when points are updated from a list whose expiry date is exceeded.

- These start and end of the application period are in a file of the ".zip" archive files on the FIS website (www.fis-ski.com) under "Alpine" FIS points section.
- AL<Z><Y>hdr.csv : in columns "Validfrom" and "Validto"
- The FIS points list number/code shall be displayed on the start list and result pages to validate the correct list is being used.

12.5. Athlete Age Classifications

Software should be able to update each competitor's age class according to the current season using official age class limits. The FIS competition years run from the 1st of July until the 30st of

June of the year after. A competitor's age class is determined from Jan.1st to Dec 31st. These categories must be updated according to the rules, see article 607 of Alpine Skiing ICR.

13. Paper Editions of Competition Lists

The software should be able to produce the following lists:

All levels:

- Entry list
- Entry form
- Draw List by Points
- Draw cards
- Start List Run 1 (One Run Events)
- Start List Run 1
- Start List Run 2
- Start List Training Run (DH)
- Unofficial Results - One Run Events
- Unofficial Results Run 1
- Unofficial Results Run 2
- Official Results – One Run Events
- Official Results -Run 1
- Official Results – Run 2
- Official Results Alpine Combined
- Bracket (only for parallel)
- Results by Rank Training Run
- Penalty Calculation
- Equivalent electronic time report (in case of missed time)

Level 0:

- Analysis

Refer to the ICR 617.3.4 for the information on the start and result lists.

Any other report, like TD report, report by the referee must be not covered by the software or filled by the timekeeper.

The Equivalent electronic time report, if used, must be signed by the TD and the Chief of Timing.

Report examples in appendix A

14. Fields

14.1. Statuses (IRMs)

There are six IRMs that will have: immediate consequences on the rankings.

The software must be able to take into account the following statuses:

Mark	Description
DSQ, DSQ1, DSQ2, DSQ3	Disqualified (Run 1, Run 2, Run 3)
DNS, DNS1, DNS2, DNS3	Did Not Start (Run 1, Run 2, Run 3)
DNF, DNF1, DNF2, DNF3	Did Not Finish (Run 1, Run 2, Run 3)
DNQ2	Did not qualify for second run
NPS, NPS1, NPS2, NPS3	Not Permitted to Start (Run 1, Run 2, Run 3)
DQO	Disqualified for Over Quota
DPD	Disqualified for doping offense (special case and must be only entered by FIS)

14.2. Marks

Mark	Description
PF	Photo finish
*	Snow seed
DQP	Potentially Disqualify (only for partial or live information)

PF: Photo finish

*: Snow seed

DQP: Potentially Disqualify (only for partial or live information)

14.3. Procedure in case of missed time:

- 1) We put the athlete as DNF
- 2) Then we will display *DNF (with a star)
- 3) As soon as we have a calculated time* or photo finish time, we display the time with a star
*1:23.56
- 4) The report and the calculation must be checked by the jury before the official result publication

*In case manual timing is used, the net time will not be published before the correction can be calculated according to the rule (10 times). (ICR 611.3.2.1)

14.4. Documents Headers

The Lists must be made available in English in addition to the language of the country and must contain certain mandatory header information on Start Lists and Results. See appendix A

15. Start list

15.1. Bib assignment / Draw

Software should allow to change bib assignment according to each discipline requirements. Provides an electronic random draw or a manually entry after the draw.

Exclude competitors of category or gender out of the current competition scope. See articles 217, 621 (621.9) of Alpine Skiing ICR

The software must allow to establish start lists for any format (with or without Bibo, from a file, from another (qualification) event, ...). See articles 1212.4 and 1212.5 of Alpine Skiing ICR

15.2. Snow Seed

The snow seed have to be marked on the start list according ICR art 621.10

15.3. First run

Software must be able to create a Start List for paper production following the draw.

See article 620 of the Alpine Skiing ICR.

15.4. Second Run

Possibility of operating an adjustable “bibo”: best ranked of the first run start in reverse order according to each discipline rules. The option to reverse either the top 15 or 30 based on Run 1 Rank needs to be available. Ensure ties are ranked correctly.

See section 621.11 of Alpine Skiing ICR.

16. Abbreviations

All abbreviation should have a legend at the bottom of the concerning document.

17. Competition results exportation to FIS

The software must be able to create result files in XML format.

The XML file must meet this format:

"Nation code" + "Event codex".

Example: "FRA5560.XML".

These files must fully comply to the definition available on the FIS website (www.fis-ski.com) under "Alpine" Timing & Data section.

The XML format is common to all events. After the event, the result and the electronic timing report XML files will have to be sent to FIS by e-mail to the following address: [results\[at\]fisski.com](mailto:results[at]fisski.com).

XML files may also be submitted via the FIS Member Section API. An API token is required and can be generated in the FIS Member Section. The token must be assigned to an individual user and must not be embedded in the software or linked to a company.

18. FIS Live timing usage

FIS provide a live timing service, if the data software support this feature,

This system can be used to register FIS races for FIS live results service on all competition levels.

All entered data for live races will be saved in the FIS database and visible linked on the FIS website.

USER: For the information on how to connect to FIS Live Timing see FIS website (www.fis-ski.com) under “Alpine” Timing & Data section.

19. Live timing developers

If any company have any interest to implement the live timing feature, they have to contact the FIS IT ([it\[at\].fisski.com](mailto:it[at].fisski.com)) department to get more details.

20. Live data usage

In case the timing data has to be used for different purpose like for example live streaming, TV graphics, etc... the data must be generated from the main timing system (System A).

The synchronisation between the image and the data overlay (graphic) must be checked.

21. Document Control

21.1. Version 1.10

Section	Description
Item 11	Event names updated
Item 14.1	Statuses updated
Item 13	Note added
	Minor updates

21.2. Version 1.11

Section	Description
Item 1	Levels list updated

21.3. Version 1.12

Section	Description
Item 8	Precision according the Timing booklet
Item 11	Event names updated
Item 13	New report (EET calculation)
Item 14.2	Procedures for missed time and special live status added

21.4. Version 1.13

Section	Description
Item 20	Live data usage section added

21.5. Version 1.14

Section	Description
Item 11	Event names updated
	All mentioned FTP links removed (depreciated soon) and replaced by website links
	Document layout updated

21.6. Version 1.15

Section	Description
Item 22	Appendix and document control switched

21.7. Version 1.16

Section	Description
Item 17	FIS Member Section API submission option added

22. Appendix A

Reports examples on the next pages.

DATA BOOKLET

ALPINE SKIING

Appendix A

Appendix Overview

Recommended Report Format

The following pages present recommended examples of key competition reports, including Start Lists, Result Lists, and Additional Output Reports. These examples illustrate how such reports can be structured and which essential information must be included. While the layout and design are flexible, the content must ensure clarity, completeness, and consistency across all competition documentation.

Key Guidelines

Presentation Style: The formatting is open to customization. Organizers may choose to adapt the layout to suit their branding or operational preferences.

Information Blocks: The competition information block (e.g., event name, date, location) may be placed before or after the athlete data, depending on the desired visual hierarchy.

These templates serve as a reference for best practices and help ensure that all stakeholders—athletes, officials, media, and spectators—receive clear and accurate information.
