

# **Audi FIS Ski World Cup**

## **Official Winners Presentation Procedures for Speed Events**

### **(DH and SG) 2023/24**

We kindly ask that you please follow all the steps below as part of the Audi FIS Ski World Cup Post Race Procedures for speed events. These procedures will be discussed during the Operations Production Meeting and therefore FIS advises all organizers to include all the relevant personnel mentioned below to be in attendance.

*\*The Winners Presentation Procedures for Speed Events are presented below in chronological order*

#### **SET-UP**

- As the last racer comes through the finish line and stops, the Exit Gate is closed off by security not allowing un-authorized persons into the Finish Corral.
- The OC Finish Operations Personnel open the air fence at the predetermined place. This opening should also act as the entrance for all of the Ceremony Personnel. Entry at this opening will be strictly controlled by Security.
- The OC Finish Operations Personnel together with security, install a rope line and then a fence line at the finish line (or above at a slipper exit if this is more convenient) to direct all skier traffic from the racecourse. All the skier traffic including team members from the slope are directed out of the course through a designated exit. This closure must happen immediately after the last racer crosses the finish line.  
Security will only be allowing photographers from the slope to enter into the podium area as directed by the chief of photography.
- The Announcer must come from the Announcer's Box into the Finish Corral with a mobile microphone.
- The Audi/FIS personnel and the required number of OC Finish Operations Personnel pass the podium, awards back drop, and awards carpet over the Finish Area fence and set it in position.
- Photographers will be allowed into the Finish Corral however they will be positioned at the end of the finish corral with their backs against the airfence and be asked to lower down onto one knee to not block the view of the persons behind! They will be managed by the chief of photography.

#### **RUN-DOWN**

- After the last racer crosses the finish line – Longines will start a countdown timer of 10mins that will be displayed on one of the small Longines scoreboards in the finish area
- After the Jury announces officially that there are no disqualifications and everything in the Finish Area is ready – the Announcer will be given the go ahead signal only by the FIS Director of Race Operations, to begin with the Official Winners Presentation.
- The Winners Presentation will begin with the FIS Fanfare (short version) being played, this is also when the top 3 athletes will walk together out to the podium and position themselves directly behind the podium.
- The top three athletes will be announced in the order: 3rd place, 2nd place and 1st place and step up on to the podium one by one. This is done without Presenters. When all three athletes are on the podium, there will be a 10sec photo opportunity before the Announcer introduces the Presenters and the flowers/awards can be distributed (if the OC has planned some).
- After all the athletes are congratulated and given flowers, a child with the winning athlete's National Flag will move into an earlier defined position in front of the podium and the National Anthem of the winning athlete will be played.
- If the OC has any special awards to present, then after the nation anthem these presentations can be done with the athletes remaining on the podium.
- When requested, unilateral interviews will be conducted after the completion of the Winners Presentation back in the mixed zone at the Audi leader board backdrop.
- The top 3 athletes will then be directed to the media area in the mixed zone where all postrace ENG interviews will then be conducted.
- The top 3 athletes should have an offer for OC provided transportation from the finish area back to their hotels after they are finished with their interviews in the mixed zone. Please note that a team member often accompanies athletes in this transport.
- In case there is a Doping Control, priority is given to the mixed zone interviews 1<sup>st</sup>. FIS suggests the location of the Doping Control be somewhere close to the finish area if possible.

For any further questions, please don't hesitate to contact
