Scores from each section can be divided equally between all sections in the slopestyle or each feature / section can have different values. Also different features in one section can have different value.

If a competitor has a fall or crash as defined in the Snowboard & Freeski Judges' Handbook on their run, all sections after the affected section will receive a score of zero. The application will be discussed at the TCM.

3403.3.2

OverallComposition Judges

One panel of two ~~or to~~ three judges will evaluate the run based on Judges Criteria Used.

The total score from OverallComposition judges will be calculated with the average of the scores from the OverallComposition judges.

5102.1.2.1 Characteristics of a Cross Course

Following the idea of Cross-sports, the cross trackcourse must allow competitors 4 – 6 athletes to complete a trackcourse with elements/features as speedily as possible. During the heats (4 or 6 competitors) Exciting runs are created by overtaking opportunities from start to finish. Different jumping/features – elements such as berms, curves and waves, rollers, jumps, etc., should be included to make it difficult/challenging to master the course. For course Design, features and course preparation refer to the Course Building Guidelines

5104 Warm Up Slope

Appropriate w/Warm up slopes must be made available. outside the competition course should be made available to the participating teams to be used under the direction of the Organiser. Warm up slopes are not under the control of the Jury and are not governed by the ICR.

5401.3

Did Not Finish (DNF)

All decisions concerning DNF will be the responsibility of the Jury.

DNF will be imposed for:

- A competitor, who did not pass a gate correctly (5401) receives a DNF and must no longer continue through further gates (5402) and is not allowed to climb back to pass the gate correctly
- Loss of Ski(s) or Snowboard (5611.1)

5404 In Race Interference

5404.1 Contact in Cross is common. Every decision and every ~~move~~action in Cross is ~~deliberate~~so this is called “in race decision” and deliberate. This conscious racing can lead to interference.

The determination of interference by one competitor against other competitor(s) shall be made by the jury. Suspected interferences can be brought to the jury’s attention by acting jury members, section judges or review requested by a competitor in the finish area or the TD immediately following the heat. The jury can use recommendation from Section Judges and/or video evidence provided by coaches/staff, and/or “Video Review” from TV Production in the decision process.

From provided evidence, the jury must determine if interference or adverse effect has occurred. Interference shall be determined based on the articles 5404.1.1 and 5404.1.2 of the ICR.

All jury decisions regarding Interference must be confirmed prior to the start of the next heat, and cannot be protested.

5404.1.1 Level of Interference categories

~~Level of~~ interference is categorized as follows:

- ~~- Intentional contact / action — red/yellow~~
- ~~- Involuntary contact / action — yellow/warning~~
- ~~- Incidental or accidental~~

Intentional ~~interference~~contact/action can occur when a competitor purposefully creates contact that may directly affect the racing of another competitor.

Involuntary ~~interference~~contact/action can occur when a competitor makes an “in-race” decision creating contact that directly affects the result of another competitor.

Accidental or Incidental ~~interference~~contact/action is not deliberate and is determined by natural circumstances of Cross, which can include effects of heat racing (side by side, traffic), terrain features, course setting, ~~and competitor error~~weather and snow conditions.
