We kindly ask you to proceed according to the rules:

2. Snow conditions

2.1 Snow Control

The Organising Committee must constantly inform the FIS Race Director on the snow conditions and preparations, especially during the last 3 weeks before the event. A snow controller is nominated by the FIS Office for each World Cup stage and is responsible to send a report to the FIS Office friedrich@fisski.com **13 days before the event.**

If the snow report is negative the Race Director will coordinate the work of an event preparation group that is comprised as described in article 2.2.

2.2 Event Preparation Group

In the case of difficult snow conditions 13 days before the event, an event preparation group will be appointed in order to make a decision on the possibility to hold the events as planned or to make any necessary changes.

The members of the event preparation group are:

- The FIS Race Director
- The FIS Event Coordinator
- 1 representative of the Organising Committee
- 1 representative of the National Ski Association
- The chairman of the FIS Cross-Country Committee

The event preparation group will make its decision at the latest 9 days before the event. In any case, the competition courses must be ready at the latest 5 days before the event.

In the meantime, both the host NSA and FIS will look for potential alternative locations within the same country or another country according to article 1.2.1.

If necessary the FIS Race Director can nominate an expert (FIS TD or FIS homologation inspector) to be sent to the site in order to inform the event preparation group on the snow conditions, the snow production / transportation progress and the course preparation.

All the travelling and accommodation costs will be paid by the OC.
In addition the expert will receive a daily rate paid by the OC according to ICR 304.1.1.

This timeline do not apply for city sprints.

Many thanks and best regards,

INTERNATIONAL SKI FEDERATION
