Version 1 of XML description is still valid still is valid but will be deprecated and exists separated from version 2.

Encoding should be in UTF8.

If optional elements are used (not empty) they should at least contain the required child elements.

Language for the content is English and characters for data content should be only latin letters.

Example: AUT1234.xml

Result XML files can be sent as one file or also more than one file within one email. Files can be also sent packed in ZIP file. The ZIP should only contain the result file(s) but no folders or hidden system files.

Send the results to [results@fisski.com](mailto:results@fisski.com). ([alpineresults@fisski.com](mailto:alpineresults@fisski.com) is also valid)

Please note that the examples do not need be correct in terms of data but should only show the XML structure.
