Snow Control for Ski Jumping and Nordic Combined Events, Season 2020/21

Dear Ski Friends,

You have been appointed as FIS snow controller (see enclosed list). We kindly ask you to check the snow conditions in order to secure the departure of the teams and officials to the competition site. Please note that Nordic Events (together with Cross-Country) have the snow control 15 days before the event, all other events have the snow control 8 days before the event

It is your task to inspect the snow conditions on place, which means: Is there sufficient snow on the hills and courses for Nordic Combined, how much snow is produced? If you have reliable information about the snow conditions, you do not need to inspect the competition site.

The report on the situation of the hills and courses for Nordic Combined as well as the produced quantity of snow has to be sent to Josephine Aschhoff aschhoff@fisski.com at the FIS Office.

If you are not able to make the snow control, we kindly ask you to let us know immediately. Many thanks in advance for your hopefully positive snow report.

Kind regards and all the very best,

INTERNATIONAL SKI FEDERATION

Josephine Aschhoff
Nordic Assistant

Enclosure: ment.
