**PRECISIONS AND INSTRUCTIONS FOR MASTERS ALPINE SKIING FOR  
THE SEASON 2021/2022  
EDITION Southern Hemisphere**

---

- National Ski Associations \*

\* Will be sent to the National Ski Associations for the attention of the team captains and trainers. The reproduction of further copies is the duty of the National Associations.

---

**1) INTRODUCTION**

The Sub-Committee for Masters Racing convened in a Conference Call on May 7<sup>th</sup> during the FIS Spring 2021 Virtual Meetings and approved the Precision for the calculation of the Base MAS FIS Points List 2021/22 (BL 2022) that can be seen below.

**2) BASE MAS FIS POINTS LIST (BL) 2022**

Due to the exceptional circumstances, the high number of scheduled competitions that had to be cancelled and disparate travel restrictions during the Season 2020/21, the calculation of the Base MAS FIS Points BL 22 to be published in June 2021 shall include all valid results between 01.07.2019 and 30.04.2021.

All Injury Status that were approved and published on the BL 21 will remain valid if a competitor does not achieve better results in the 2020/21 season.

The required number of results and period to apply for Injury Status remains valid from 01.05.2020 until 31.04.2021.

**Methodology (Proposed by FIS IT Dept):**

The BL 2022 will be calculated as follows:

- Step 1 calculate a BL with normal dates
- Step 2 calculate a BL with the extended dates (merging of both Season)
- Step 3 Compare the 3 BL (BL 2021, BLs calculated in Step 1 and 2) and take the better value between this 3 BLs for the BL 2022

The BL 2022 will be the result given by the step 3.

2 marks will be added:

"1" = BL points from BL 2021 if better then Step 2

"2" = BL points from BL 2022 with normal date range (01.07.2020 - 13.04.2021) if better then Step 2 and BL 2021

### 3) **FLUORINE WAX BAN UPDATE**

The FIS Council convened in Conference Calls on June 1<sup>st</sup> and 2<sup>nd</sup> 2021 and decided to delay the introduction of the Fluorine Tracker until after the Season 2021/22.

The Council agreed to support the IBU decision and prohibit any products containing C8 fluorocarbons/PFOA at all FIS events from season 2021/2022 onwards, in line with the EU Regulation 2019/1021 (“POP-regulation”) and EC Regulation 1907/2006 („REACH“-regulation), which regulate the handling of fluorinated waxes.

The decision about some declaration of NSA’s and potential sanction is postponed till Fall to be able to check all legal aspects.
