

FIS Equipment Control World Cup, COC, FIS Cup Ski Jumping and Nordic Combined Requirements for the Control Room 2022-2023

Based on the decision of the Jumping Committee, the following amendments of the selection criteria are requested for the upcoming seasons:

- Heating system working from the arrival of the controller (the room must be clean and warm)
- 1 table size - 1.5 x 0.6 meters, 1 table – 2.0 x 0.8 metres
- wooden board for ski control – 3.0 x 0.3 metres
- 3-4 chairs
- 4 power outlets (to plug in the electric devices) and enough light
- WLAN
- Direct TV feed/signal of the competition with monitor
- Annually calibrated and certified scales, class III level (display 100 gr)
- Enough drinks and snacks for the athletes
- According to the drawing below, the room must be divided in two parts – a waiting area and the control area

Requirements Start area/platform for athletes in In-run (construction unit)

- Start area/platform (not the entire in-run) of jumping hill shall protect the athletes from rain/snow/wind etc. with a kind of roofing/covering (mandatory as from season 2016/17)
- Crotch control device updated accordingly to new rules to 30 cm (can be ordered from SLATNAR, see below for details) (technically revised each year) in the start area shelter (1x1m)

For COC and FIS Cup events, the NSA must nominate an assistant per gender for start control by name in the invitation.

The crotch control device can be ordered from:
